

YAKU SEIZE GEN. O'BREGON

Y. BANKERS OFFER TO TAKE TRACTION LINES

Subway, Busses for Chicago, Too.

BY OSCAR HEWITT.
(Picture on back page.)
Lisman & Co. of Manhattan, head of a syndicate of New York, Chicago and other bankers, presented to the United States transportation committee today their plan to consolidate, reorganize and refinance the local street car companies under a 20-year franchise within the conditions stipulated in the proposal. Frederick J. Lisman, president of the firm, T. V. Salt, a member of the firm, and John Maynard Harlan, lawyer, submitted the proposal.

The New Yorkers propose that they shall be given a 20-year franchise. Then they will form a new company to take over the properties of the Surface Lines. To pay for these new bonds, they will issue new bonds running for 20 years in two series. First mortgage bonds will be given present holders of mortgage bonds of more than \$90,000, and general mortgage bonds of less than \$90,000. The new present holders of junior securities of about \$50,000,000, \$20,000,000 for Extensions.

The syndicate forming the new company obligates itself to supply an amount of \$50,000,000 for extensions, improvements and new equipment. The obligations will be an equal lien on the first mortgage bonds, but will not be due until twenty years.

The plan provides that this \$50,000,000 shall be amortized in twenty years and a sinking fund will be created to amortize the present capitalization in 20 years. Whenever the franchise expires and is not renewed, the fifty-year bonds become due and payable. If the company continues to operate, the bonds for a total of fifty years, as the system becomes the property of the city without charge.

Street Buses and Subways.

In addition to operating the Surface Lines, Lisman & Co. ask the right to own buses, agree to operate the subways when built, and agree to operate the elevated lines when they are made a part of the new company. Lisman & Co. offer to build the subway at cost, plus a reasonable commercial profit, or build them for a fixed sum in advance.

Mr. Lisman is known as a student of the business, and has been connected in certain railroad reorganizations. Leonard A. Busby, president of the Chicago City Railway said that he believed that Mr. Lisman was financially able to carry out any proposal he would make; but Mr. Busby added that he would be willing to raise the \$50,000,000 of new money on the condition that Mr. Lisman had laid down, and upon those conditions it could be raised in New York, Chicago, Philadelphia or any other place where some of the money are collected.

A Gesture, Busby Says.

"As far as solving our transportation problem as a whole," Mr. Busby said, "it is a futile gesture." He went on to show how \$25,000,000 to \$35,000,000 would be needed for transportation in New money, instead of \$50,000,000.

"Under the plan proposed," Frank J. Wickersham of the First National bank said, "it would be profitable for the company, if, as they propose, the present companies are forced off the market on Feb. 1, 1927, and the new company is to take over the lines, Mr. Lisman to tell him he will find a market for even the \$50,000,000 of new bonds."

"The proposal gives priority in payment to the proposed \$50,000,000, but is invested in the next twenty years. The \$50,000,000 invested in extensions, improvements and rehabilitation of the lines, twenty years," John E. Palmer of the Illinois Merchants bank, pointed out. "That is unfair to the present bondholders."

"Offer Best Bargain."

Mr. Lisman and Mr. Harlan insisted that they would give present security holders a better bond than they now had, because there would be a sinking fund to amortize part of the bonds before the end of the plan.

"Mr. Harlan says he ate breakfast, lunch and dinner and slept with the bus yesterday for a year," Aid. Mills said. "Let him answer why he did not give a sinking fund to pay the bonds in the 1907 ordinance."

"This Mr. Harlan has promised to do with clock this morning when the bill is introduced," said Mr. Salt. "Mr. Harlan looked upon the Lisman proposal as favorably that they gained authority to defer negotiations with the bankers and local traction companies today, that the New Yorkers were heard to the finish."

The new law has a proposal by which the city got \$50,000,000 in extensions, improvements under a twenty-year franchise.

Student Calls Co-ed Drinking College Curse

College, for all its exuberances, was all right until Eve took her algebra over to her brother's campus and went in for higher education and gin drinking and petting, reasons Wilfred O. Cross in his article, "The Morality of Undergraduates," appearing in the current issue of "The Witness," a national weekly of the Episcopal church.

Cross, who is an Iowa boy who was graduated from the University of Illinois last June, and who contemplates training for the Episcopal ministry, points out that:

"Troy was neither beleaguered nor criticized before Helen came. And the morality of college was not in question before the coming of the co-ed."

Drinking a Minor Vice.

Then he goes on to say this of the co-ed:

"Drinking is now a minor vice for dating, a comparatively diversion which includes dancing, drinking and petting. Women now participate in drinking bouts to an extent which is to the uninitiated, astounding."

"I know of a train load of sleeping coaches bound to an interuniversity football game last fall in which—colleagues of both sexes, most of whom were quite drunk, staged a pajama dance in the aisles between sleeper berths. Inevitably many of the men shared berths with co-eds."

"Nor was that outbreak the self-expression of a few daring souls, but a general condition, pervading three long trains of sleepers."

The Bottlegger's Entrance.

Commenting upon the "fashionable custom" of co-educational drinking, Cross declares that a certain sort of woman, when placed under quarantine, found it expedient to be supplied by the backdoor route.

"I can personally vouch," he adds, "that huge quantities of gin are carried there."

Of official college dances there is no complaint. But the drinking dance in the apartment room, the office, or other secluded place, is under no great restraint, he believes.

"These affairs, made interesting by petting, abbreviated costumes, and drinking, are today the least only mildly respectable though only characteristically of the old days since the participation of the college woman has become a bacchanalia."

The coming of the co-ed into the student's work time has brought her also into his play time, Cross declares.

Restless Charming.

"It is the sophisticated, the sex-wise co-ed, who has become legitimate game. As one man puts it, 'Women have descended to the bestiality of men.' I do not imagine that the college woman, of yesterday, was very enticing, but the co-ed, with her pretty clothes and charming chatter, might

THE WEATHER

TUESDAY, SEPTEMBER 14, 1926.

Clouds, 6:30 a.m. to 7:30 p.m. Moon sets at 11:15 p. m. today. Mercur and Venus are morning stars and Saturn and Jupiter evening stars.

Chicago and vicinity—Unsettled Tuesday and Wednesday, showers probable; slightly warmer Tuesday; winds mostly moderate easterly.

Illinois—Unsettled on Tuesday and Wednesday, showers and possibly local thunderstorms; slightly warmer Tuesday in north and central portions.

G. O. P. Ticket in Maine Is an Easy Winner

Portland, Me., Sept. 13.—(U.P.)—The election of Gov. Ralph O. Brewster, Republican, was assured as returns from most of the larger cities were added late tonight to the vote of the towns in today's state election. In 533 precincts out of 693 in the state, representing 457 cities and towns out of 519, the vote was: Brewster, 60,927; Ernest L. McLean (Dem.), 60,871.

The state's four representatives, all Republicans, were re-elected.

The same places gave a majority of nearly 12,000 against the constitutional amendment to prohibit the appropriation of public funds for private schools and other institutions, which was sponsored by Gov. Brewster and was a leading issue in the campaign.

The total vote of these precincts was far behind that of the last state election in 1924. Indications were that less than one-third of the total vote cast two years ago was polled today. The Republicans won by 35,000 in 1924.

FRANK SPALLA'S JINX HAS HAPPY TIME ALL DAY

It was a tough day yesterday for Frank Spalla. Frank, with his old white horse, started from the railroad yards with a load of muskmelons. At street and Roosevelt road, driver of a street car dumped the wagon.

Children started to run off with Spalla's melons. Along came William Vincent, 3245 30th Avenue, driver for the surface lines wrecking truck. He accused Frank of being slow in clearing up the debris and blocking traffic.

"I'm doing my best," Frank shouted as a child hustled off with another melon.

But Vincent thought differently and landed a right on Spalla's jaw.

More than fifty track workers armed with sledges, picks and shovels, were going to Frank's aid when the police arrived and dispersed the mob. Killed by the police or military Mr. Spalla would be shot. Mr. Spalla also was told that he would be notified of the amount of ransom for the captive. Pointing his gun at the chauffeur, the robber chieftain ordered the Americans to move on quickly.

Sought U. S. Attack, Belief.

Mr. Spalla believes the bandits intended to capture Arthur Lane, under-secretary of the American embassy here, but stopped the wrong automobile. The embassy did not support this belief.

However, Mr. Lane and his wife missed being attacked by the robbers by a small margin, as they passed the scene of the abduction five minutes after the robbers had made off with Mr. Spalla.

Some in the American colony believe that Mexican politicians, wishing to make trouble for the government had knowledge of Mr. Lane's trip from Cuernavaca and endeavored to kidnap him, hoping to cause international complications with the United States.

A Redefinition of Man.

[Chicago Tribune Press Service.]
New York, Sept. 13.—Jacob Rosenthal, who was kidnapped by bandits in Mexico today, is a resident of Woodmere, L. I. He was for many years proprietor of the Excelsior market in Aventura, L. I. He is well known there and in Brooklyn. He retired from business about ten years ago, having become moderately well-to-do through investments he made in real estate in this vicinity.

MEXICO RUSHES TROOPS; RESCUE EX-PRESIDENT

Hunt Kidnaped Yank and Captors.

BULLETIN.
[Chicago Tribune Press Service.]
Mexico City, Mex., Sept. 13.—An official statement of the government tonight confirms the report of Yaku Indians seizing Gen. O'Brien and states that the Yaku, under Gen. Matus, took him off the train. The report further states that the government has ordered 5,000 troops from Sonora and adjoining states to converge on Yaku country.

Mexico City, Sept. 13.—(U.P.)—The Yaku Indians in the state of Sonora are in open rebellion and federal troops have been ordered to subdue them. This information is contained in an announcement issued at the presidential office tonight.

The announcement says that about 1,000 Indians stopped a railroad train on which former President O'Brien was traveling near Yucum. Gen. O'Brien and the 150 soldiers accompanying him prepared to defend themselves, but the Yaku did not attack.

The engine of a military train sent out to rescue Gen. O'Brien was over-turned and two persons were killed. It is not known whether the Indians derailed the engine.

After some delay Gen. O'Brien proceeded to his home at Cajeme.

HUNT YANK CAPTIVE

BY JOHN COBURN.
[Chicago Tribune Press Service.]
[Copyright, 1926, by The Chicago Tribune.]
Mexico City, Sept. 13.—Mexican troops searched today for a band of six masked bandits who last night held up a party of Americans who were returning to Mexico City from Cuernavaca, a summer resort 65 miles from here. The bandits kidnaped one of the party, Jacob Rosenthal of Woodmere, L. I., a capitalist, 62 years old. Arthur H. Schoenfeld, counselor of the American embassy, made urgent representations to the Mexican government demanding prompt capture and punishment of the abductors.

The party of Americans, including Mr. Rosenthal, who was here on a visit, Mr. and Mrs. Jack Zahler, and Mr. and Mrs. Joseph Ruff, son-in-law of Mr. Rosenthal, were held near Huixtla, an Indian village 15 miles from Cuernavaca by a party of typical Indian mountaineers, who leveled rifles at the Americans.

Rob Party! Held Aged Man.

The bandits searched the men and women, taking money, rings, overcoats, and wraps. The leader then ordered all but Mr. Rosenthal into the auto. The latter attempted to follow, but the leader threatened to shoot him if he moved.

Mr. Zahler said, "You have taken all we have; why detain the old man?"

"He is the man we want," the leader said.

He handed Mr. Zahler a paper, covered with typewriting, evidently prepared in anticipation of the situation, which said that if the robbers were followed by the police or military Mr. Rosenthal would be shot. Mr. Zahler also was told that he would be notified of the amount of ransom for the captive. Pointing his gun at the chauffeur, the robber chieftain ordered the Americans to move on quickly.

Hundreds Die in Ambush in Chinese War

PEKING, Sept. 14.—(U.P.)—A mutiny of allied soldiers at Kalgan today was suppressed by ambushing the mutineers at a railway station and shooting down several hundred of them.

The commanding general and two colonels were taken to Mukden as prisoners. Responding to complaints by the people of wholesale looting and other acts of highhanded oppression, Gen. Chang Tao-Lin, ally of Marshal Wu Pei-Fu in the combination against the Kuomintang (national army) allegedly ordered disarmament and disbandment of the military unit concerned. Efforts to carry out the order precipitated the revolt.

Near War with Britain.

[Chicago Tribune Press Service.]
SHANGHAI, Sept. 13.—That Great Britain and China rapidly are drifting into a war situation, which is almost certain to involve the United States, is the general belief here, owing to the renewed Chinese outbursts against the British.

Reports tonight state the Chinese militarists in the upper Yangtsi region are massing troops and artillery on the river banks, awaiting the threatened British expedition back to Wanchow to release the cargo boats held by the Chinese militarists.

U. S. Destroyer to Rescue.

When the British steamer Kiangwo, bearing the dead and wounded, dropped down river the ship again was fired on by the southern troops at Hankow, forcing the boat to return up river. Finally, an American destroyer stationed in the Hankow district went to the rescue, removed the wounded, and brought them to a Hankow hospital.

RUM SELLERS TRY EVANSTON TRICK; LOSE 158 BOTTLES

Last week an expensive automobile drove up to the home of one of Evanston's leading citizens in his absence that he had a few bottles that the man of the house had ordered.

That night the leading citizen, whose name has been kept secret, returned home, was told of the delivery, looked at the thirteen boxes which had been delivered, and decided a mistake had been made in the address. After waiting a day or two for the owner to call, he notified Corporation Counsel William Lister, who opened the boxes and found some 158 bottles of rare French and Italian wines and whiskeys.

Yesterday the wife of this leading citizen answered the telephone and heard a request that her husband pay for the goods. She informed her caller that the boxes were in the custody of the corporation counsel, and her conversation was ended by a click on the telephone.

Lester says that although it is the first instance that has come to his attention directly, he has been informed of several others in Evanston.

"The bootleggers are trying to force their goods on reputable citizens by tricking them and then forcing them to pay," Lester said.

Deceit Makes Gold Again Worth Its Weight in France

[Chicago Tribune Press Service.]
PARIS, Sept. 13.—Gold is worth its weight in France for the first time in seven years with the announcement that the Bank of France will pay for the yellow metal in currency at the present rate of exchange under a new decree of the government. Heretofore the gold coinage, which passed entirely from circulation, was worth only its face value in paper, with the result that everybody in France who was lucky enough to have any salted away. Every peasant in France is reputed to have his "spendable" containing his little hoard of gold. A 5 franc gold piece is worth about 84 francs (\$1379) at today's rate of exchange, where it was only worth 5 francs (\$1.44) yesterday.

GERMAN DENIES HIS \$441,000 WAS A BRIBE

Just a Fee to King, He Testifies.

New York, Sept. 13.—[Special.]—A denial by Richard Merton, German industrialist, that he had intended payment totaling \$441,000 as bribe for United States government officials in return for their aid in negotiations on his claim for the American Metal company's assets shared importance today in the Miller-Daugherty conspiracy trial in the United States District court with sharp clashes between government and defense counsel.

The government charges that Harry M. Daugherty, former attorney general of the United States, and Col. Thomas W. Miller, former alien property custodian, conspired with the late John T. King, late and now a Republican national committeeman from Connecticut, and the late Jose Smith, right hand man of Daugherty, to defraud the government.

Not Used for Bribes.

The case in question was that of the Metallgesellschaft, a German corporation, known in America as the American Metal company, the assets of which were impounded by the government during the war as those of an alien enemy.

The elation in the trial today reached their highest point when defense attorneys charged Federal Attorney Emory H. Buckner with "impeding his own witness" after he had taken Merton over for redirect examination. Merton's statement that he had never believed the sums paid by him would be used for bribes came under cross-examination.

Not a Bribe, He Says.

"Did you have any intimation that any part of the \$50,000 fee which you paid John T. King was intended for any member of the United States government?" Col. Rand asked.

"Certainly not," replied Merton emphatically.

The question which brought the argument between counsel was precipitated when Buckner asked Merton: "Tell us what you got in payment for saving the Swiss society by coming over here and rushing this claim."

Simultaneously Col. William Rand and Max D. Steur jumped up to object.

Received \$250,000 Fee.

After prolonged argument by Mr. Buckner, Mr. Rand and Mr. Steur, the defense, objection to Mr. Buckner's question was overruled by the judge and Merton testified that he received \$250,000 from the Societe Suisse. He said that he felt that he was justified in receiving this sum.

Much of today's time was occupied by the defense in asking Merton questions, and then forcing them to pay," Lester said.

Asks About King.

Here are the chief questions and answers, Mr. Rand doing the examining:

Q.—Did you know anything about John T. King? A.—I knew he was high in the councils of the administration and had good connections with high class financial people.

Q.—Did you know him to be a lawyer? A.—I did not.

Q.—You wanted to avoid lawyers on account of the number of them who were flooding Germany with offers to get back looted property? A.—Yes.

Q.—And who were charging as high as 15 per cent for their services? A.—Yes.

Q.—But you made some inquiry as to John T. King, didn't you? A.—Yes, although I know of his high standing, I didn't know he had any political position.

Q.—You wanted to have the affairs of your claim settled as soon as possible? A.—Yes, as speedily as possible.

Where He Met King.

Q.—You know Mr. W. Averell Harriman? A.—Yes, I met him in this country during the effort to finance the food supply of Germany. That's when I met John T. King.

Q.—Why was speed so essential in the transfer? A.—Because the Swiss company (Societe Suisse), another name for the Metallgesellschaft had to make up their balance sheet for the year and some disposition of the American metal stock which was being made on the books had to be made. The company was in danger of going into bankruptcy. The stockholders were getting nervous and some action had to be taken immediately. Mr. Du Bois, with his influence, was able to stall things along for a while. But if it had not been for him we would have been forced to file a balance sheet, and that might have been fatal.

Q.—How long after you met King did he introduce you to Miller? A.—I can't say definitely, few days, ten

days after. Shortly after I met Joe Smith it was suggested I go to the Hotel McAlpin and meet Miller.

The witness said he understood that the Du Pont family of Delaware owned the McAlpin and that there was some connection between Miller and the Du Ponts. Merton started to say something about "the Du Pont suite" at the hotel, but Mr. Rand interrupted him with a "never mind, that."

Q.—When you saw Mr. King in July was it not you who first mentioned a commission and a retainer fee? A.—I am sure Mr. King mentioned it first, but of course, I had expected to pay something for the services rendered.

Q.—Who then spoke of a retainer? A.—Mr. King.

Q.—Had he not suggested the \$50,000 retainer? A.—Yes, he told me his fee would be \$50,000 and I suggested the sliding scale of percentages, beginning at five per cent. I paid the \$50,000 the first day I went to Washington.

Q.—The payments you made were in the interest of speed, were they not? A.—Yes.

Q.—Did you have any intimation that any member of the United States government was to receive any part of this fee? A.—Certainly not.

Merton again told of his final trip to Washington, when he remained four days at the Shoreham hotel from Sept. 19 to 23. He related his former testimony that he saw no member of the government during this visit and that Joe Smith had informed him of the successful authorization of his claim.

If Mr. Rand had had any intimation of the question of immunity from prosecution he partly masked it, saying he had no further questions to ask just at this time.

Mr. Buckner brought the admission from the witness that the Swiss society was "dying on its feet" at the time the claim was put through, and that this saved the society from bankruptcy.

Q.—Asked About Charges. Q.—How much did you personally charge this practically dying corporation for your services in coming to this country to have its claim passed? Mr. Rand and Mr. Steuer both objected, but the court overruled the objections.

Then the question was asked again and Merton answered: "Two hundred and fifty thousand dollars."

Merton was still on the stand when court adjourned.

Surface Car Men to Ask Sick Benefit and Insurance
Streator, Ill., Sept. 13.—William Quinlan, president of the Chicago local of Surface Line conductors and motor-men, announced here tonight that he intended to ask for similar concessions recently awarded the elevated employees in arbitration.

The elevated men were granted a \$30 a week sick benefit and an insurance policy of \$1,000, the expense of both to be paid by the company.

Star of Destiny Protects Me from Assassins; I'll Die a Natural Death, Mussolini Says

ROME, Sept. 13.—(AP)—Premier Mussolini believes the star of destiny protects him from assassins and he will die a natural death.

That is what he told Robert H. (Bob) Davis of the New York Sun, who was the first American received by the premier after Saturday's attempt on his life. Mr. Davis has written the following account of his interview for the Associated Press:

"I saw Mussolini in the very room at the Chigi palace from the windows of which he addressed an impassioned speech to the people after the third attempt on his life in the last ten months. He rose from his desk piled high with unfinished business and made the Fascist salute as I entered. I returned the salute and met him standing as he came out in the space before his desk.

"An interpreter stepped forward, but the premier, laughing, said: 'If you speak slowly I shall understand you.' Behind me was an attendant bearing a fifty pound package of American newspaper clippings that I had brought with me from home at the request of the management of the Associated Press for delivery to Premier Mussolini.

"The clippings were of an interview given by Premier Mussolini to P. H. Winner of the Rome bureau of the Associated Press on the aspirations of fascism and published in this country on July 24, 1928."

"What is this you have?" cried Mussolini. "Something for me? Open."

"Pleased With Big Publicity." "I explained that it represented one day's space devoted by American daily newspapers to one of his recent caustic utterances. He ran through the pages with the practiced hand of an old newspaper man, exulted at eight column headlines, saluted his own picture, laughed at caricatures and altogether showed much gratification.

"The American press has never slighted Italy," he said. "We have received always much consideration and justice from your country. To America I always speak frankly."

"You ask why I do not protect what I call my person from the assassins? There is no need. My star protects me as Italy is protected. I shall die a natural death. As I live now there must be adventure and I must be free to come and go among the people. Always my people!"

"Will Absorb New Citizens." "As Premier Mussolini thus emphasized 'my people,' I remarked: 'In sixty years the population of Italy has increased from twenty to forty millions. You have few colonial outlets. What is to become of your people?'"

"Mussolini threw up his head like a bull buffalo projecting his great square chin. His eyes, which are banked first even in placid moods,

began to flame. His right arm went up and his white teeth snapped with Rooseveltian staccato.

"And your birth rate exceeds 500,000 per annum," I added.

"A flood of sharply defined words poured from his lips.

"Italy will absorb them," he cried. "We have rich, undeveloped land, great resources, power, energy of body and soul, and a new race is being born into this country."

"Adjusts Self to Needs." "I ask my people as an economic measure to cease importing flour and to turn back to black bread. Italy always adjusts herself to the needs of the hour. On the 18th of this month this bread order will go into effect without discomfort to any one."

"On the subject of military aviation the premier threw up both his hands, dashed across the room, and pointed to an aluminum model of a flying machine.

"There is Italy's answer," he exclaimed. "Commercial. Three times a week, Genoa, Rome, Palermo. Passenger and freight. And other lines contemplated will be completed. We are for progress, not destruction. Italy looks to America to rectify her policies with reference to the future of civilization."

"Not Interested in Germany." "Of Germany's admission to the league of nations—" I queried.

"We are not interested in Germany's affairs. Italy is what occupies us. Italy first, last, forever."

"The buffalo bull threw back his head, again, sniffed as a lion whose nostrils smell the prairie smoke, whose eyes detect an enemy."

"We must, we will both in the near future. Out of the lessons of the past we will fashion Italy's tomorrow."

"Your country comprehends the need of the hour," continued the premier. "We are alike in our principles, our aims. Our similarity is so great that I can sum up in three words the whole theory of the doctrine of the two countries."

"His Doctrine—in Four Words." "Write it," I cried, throwing a pad of paper as one newspaper man to another. He dipped his pen into a deep inkwell and wrote these three words: "Tenacity, discipline, courage." Then with a flourish of finality he added in English the words "and work," and signed.

his name, Benito Mussolini, Roma 13, Settembre, 1928."

The premier handed me the slip of paper, rose from his seat, came to attention, and made the fascist salute in farewell.

"My compliments to all America," was the last phrase of the lion as he stood beside his desk, his eyes and nostrils opened to the future."

OFFICIAL HEADS FALL
(Chicago Tribune Press Service.)

ROME, Sept. 13.—Official heads fell to the left and right today as a result of Saturday's attempted assassination of Premier Benito Mussolini. Francesco Crispi Moncada, director general of police in all Italy, "resigned" this morning and was replaced by Arturo Bocchini, prefect of police at Genoa. Prefect of Police Perrelli of Rome was succeeded by Inspector General Angelucci.

It is understood that a clean sweep has been made of all the officers in Premier Mussolini's personal bodyguard and an entirely new guard has been chosen.

Deputy Cavina, a communist, and Deputy Gronchi, of the people's party were attacked and forced to leave the chamber this morning.

ANOTHER SALTIS GANGSTER SEIZED AS MAIL ROBBER

Peter Kosinski, well known hoodlum, fell into the police net yesterday in connection with the hunt for the bandit gang which on Friday staged a daring raid upon a Grand Trunk Pacific train in Evergreen Park, escaping with two government mail pouches containing \$135,000.

Kosinski, known to his associates as "Three Fingers Pete," was arrested at his home, 4844 South Winchester avenue, by Lieut. Joseph Roman and Sergt. Charles McShane of the detective bureau. After a brief questioning he was turned over to postal authorities.

His apprehension was taken as an indication that the lines of the investigation are being drawn closer about such members of the old Frank Mc-

Briano-Joe Saltis booting him as are still at liberty.

Kosinski was found with Saltis when the latter was captured recently by Acting First Deputy William Schoemaker and a picked squad at Tomahawk Lake, Wis., but was later released.

Arrest of Kosinski followed closely further questioning yesterday of Nick Kramer, another Saltis gangster. Kramer has been partially identified by one of the mail clerks in the holdup.

Vibrationless
A New Feature in Some Cars
—an Old Friend in Studebaker

Trumphet as an amazing new feature in some cars—freedom from vibration and smooth, quiet power have long characterized the performance of Studebaker L-head engines.

For years Studebaker has been spending \$600,000 annually to insure this smoothness by building balance into crankshafts.

And all other vital parts of the powerful Studebaker L-head motor are machined with utmost precision to deliver this same result for hundreds of thousands of miles.

Owners of One-Profile Studebakers enjoy an excess of power as proved by the recent run across the continent of a Big Six Sheriff in 86 hours, 20 minutes—smashing all previous transcontinental automobile records.

Let us demonstrate this outstanding feature of these new Studebaker Custom Sedans.

Standard Six Custom Victoria — \$1395
Standard Six Custom Sedan — \$1385
Big Six Custom Brougham — \$1985
The President, a Big Six Custom Sedan (for seven) — \$2245

(L. A. factory including the wheels, which makes and rebuilds everything Studebaker produces.)

ADVERTISE IN THE TRIBUNE

NEW BOATS "TADPOLE" INTO CANAL

Madden Sees It; F Deep Water

When two barges and a tug, the military district Lockport yesterday a commercial tugboat, the "Tadpole," was completed. This was the first tugboat to be built in the district. At the same time, the tugboat "Tadpole" was built in the district. The tugboat "Tadpole" was built in the district. The tugboat "Tadpole" was built in the district.

Herives Dismantled
From La Salle, Ill., to La Salle and barges made steady progress. The canal is nearly 100 years old, used by mules to tow the barges. The canal is nearly 100 years old, used by mules to tow the barges. The canal is nearly 100 years old, used by mules to tow the barges.

Uses Tractor Fuel
The engine of the tow tug (tractor) just the same army tank or a farm machine dropping perforated pads of water, thus obtaining steady value of the new system planned, is that it can operate shallow water. Thus it will move 15,000 miles of new artifice to carry a cargo in the return journey.

The deep-sea waterway tract from the availability of water, thus obtaining steady value of the new system planned, is that it can operate shallow water. Thus it will move 15,000 miles of new artifice to carry a cargo in the return journey.

The project discussed here has as its principal object the making of the Illinois river deep sea commerce, it will be needed between 1928 and 1930, the government to spend \$2,000,000 in dredging the river.

"There is a bill pending in the Senate providing for that," said yesterday, "and it is up Dec. 14 and we expect before Christmas. With the year commerce will be between New Orleans and water."

ACCIDENTAL SHOT
Mrs. Sophia G. Gorman, 52, South Wood street, died in hospital yesterday as a result of shooting herself in the back.

AKER

HE TRIBUNE

NEW BOATS TURN "TADPOLE DITCH" INTO CANAL AGAIN

Madden Sees It; Pledges
Deep Waterway.

When two barges and a towboat en-
tered the sanitary district canal at
Lockport yesterday a demonstration of
the navigability of the old and long
abandoned Illinois and Michigan canal
was completed. This was an opening
of water transportation from Chicago
to the gulf. At the same time Com-
missioner Martin E. Madden was
declaring that the government would
reopen the canal for navigation.

The test trip was made possible by
the Standard Unit Navigation com-
pany, which sent towboat and barges
from St. Louis, Mo., to prove that its
regular water tractor towboats can
haul freight in hitherto unused waters
which had been renamed, informally,
"Tadpole ditch."

From La Salle, Ill., to Lockport, tow-
boat and barges made steady progress
in the 42 miles of canal that was dug
early 100 years ago, used for several
years with mules to tow barges, and
then gave way to the railroads.

The secret of the success of the
trip, according to Carl J. Baer of St.
Louis, president of the company, is
that the boats were designed to fit
the canal and they held a standard
draft of 10 feet. The towboat, which
was Mr. Baer, Arthur B. Baer, secre-
tary of the company; C. T. Baer, en-
gineer; George Pullman, and L. H.
Hildt, crew; from St. Louis, Mo., to
prove that its regular water tractor
towboats can haul freight in hitherto
unused waters which had been re-
named, informally, "Tadpole ditch."

Uses Tractor Paddles.
The engine of the tow boat operates
the tractor just the same as on an
any tank or a farm implement, but
using perforated paddles into the
water, thus obtains steady pull. The
size of the new system, it was ex-
plained, is that it can operate in very
shallow water. Thus it would open up
1,000 miles of new arteries for the
movement of freight. The company
expects to carry a cargo to St. Louis
in the return journey.

The deep-waterway will not de-
tract from the availability of the sys-
tem that can be applied to shallow
waterways, it was said. The project
which Congressman Madden discussed
yesterday does not take the Illinois
and Michigan canal into consideration.

More Deepening Illinois River.
The project discussed by Mr. Mad-
den has as its principal necessity an
improvement of the government
navigation of the Illinois river available
for commerce, it was explained.
Locks are needed between Joliet and
Alton and the government is proposing
to spend \$3,000,000 in building them
and dredging the river wherever
needed.

There is a bill pending in the sen-
ate providing for that. Mr. Madden
said yesterday, "and it will be taken
up Dec. 14 and we expect it to pass
before Christmas. Within two or three
years commerce will be carried on be-
tween New Orleans and Chicago by
water."

ACCIDENTAL SHOT KILLS WOMAN.

McErlane in Penitentiary Pending Trial for Murder

Indiana's judicial machinery landed
Frankie McErlane behind the stanch
walls of the Indiana state prison at
Michigan City yesterday. McErlane
is the Chicago beer chief whose whisky
parties in our well known jail brought
him drunk into a courtroom in Chi-
cago in the early summer.

The hoodlum king, whose lavish tips
bought him forbidden luxuries in the
Cook county jail, yesterday took a
prison haircut. Every penny and jewel
he carried was taken from him.

He donned the prison gray garb of
the 1,700 others in Indiana's city of
silent men. He sat in a solitary cell
and his exercise was taken under
guard—and alone.

That will be the order, says the em-
phatic warden, Walter H. Daly, until
McErlane is freed by a jury of Indiana
farmers of the murder of Thaddeus
Fancher, a Crown Point lawyer, or
until he dies in the electric chair.

Seek Death Penalty.
That death chair is right handy —
just a matter of steps from the gang-
ster's cell—and it is the sternly voiced
intention of Indiana's best criminal
prosecutors to seat Frank McErlane
in it at an early date.

Indiana hasn't dealt a bit kindly
with McErlane in the four weeks it has
had him—after that state won a two
years' fight to extradite him for the
crime. And Indiana, according to its
authorities, doesn't propose to lose
him.

From the Cook county jail, where
McErlane's penalties included a soft
cot in the select hospital ward; where
he was able to buy booze from the
jail bootlegger; where he openly defied
the officials in charge; where he had
the fight to spend all the money he
had in any way he wished; where he

could spin the prison grub and send
out for savory dishes—from this bed
of roses McErlane went to the Lake
county jail at Crown Point.

Slept on the Floor.
It was a bit crowded and so he was
shoved into a cell with other prisoners,
and, being the latest comer, was forced
to sleep on the floor. He complained,
finally pleaded, but his breath was
wasted, and for twenty-seven nights he
slept on the floor. No booze, no
visitors except his father and his gang-
ster brother, Vincent, jail flapjacks
and beans, no tender hospital treat-
ment.

Then McErlane's expensive legal tal-
ent decided on a change of venue,
which was accordingly granted to Por-
ter county. Perhaps there had been a
hint about the little old jail at Val-
paraiso, where there are only fifteen
prisoners and no guards when Sheriff
William B. Forney isn't about.

But the sheriff had counted on that,
and yesterday when Sheriff Ben Strong
of Crown Point prepared to remove
McErlane to Valparaiso Sheriff Forney
decided to take no chances with the
troublesome prisoner and made all
arrangements to have him confined in
the state prison until the trial comes up.

More Bad News.
So McErlane heard prison gates
clang behind him, and then got the
bad news from Warden Daly.
"We can't work him on the farms
and vineyards," the warden said, a
regretful note in his voice. "He is
here just for safe keeping, and to keep
him here is the main objective."

"He's going to stay in a solitary
cell all day, except for brief exercise
periods when a guard will walk him
about. His cell is under the eye of a
guard post constantly manned, so Mc-
Erlane will behave. We have no fears
about it."

PLOT SUSPECTED TO ASSASSINATE MARKOWITZ'S SON

A plot to assassinate Meyer Marko-
witz was suspected by police yesterday
while in the midst of their plans to
arrange a speedy trial for Roy Tag-
ney, union official, under indictment as
the slayer of young Markowitz's fa-
ther, Morris Markowitz, a Landis
award teaming contractor.

The elder Markowitz, who, with his
son, had waged open warfare against
Tagney's organization, the machinery
movers and riggers' union, was shot to
death on Aug. 3 at a builder's shanty
at 37th street and Princeton avenue.
The killer escaped.

Suspicion that a move to harm young
Markowitz came to Mrs. Minnie Mar-
kowitz, his widowed mother, when a
strange man called her home at 4142
Berkeley avenue with supposed infor-
mation incriminating Tagney.

Mrs. Markowitz accepted the man's
offer to come to her apartment, but, re-
membering Meyer's attack on Tagney
at the detective bureau Sunday, she
took the precaution to notify police.

"It was Tagney who killed your hus-
band, and the fellow that helped him
is now in Cleveland, in hiding with a
woman," the man told her when he
arrived.

Just then Detective Sergeant Thom-
as Burke and Michael P. Naughton
stepped from their place of conceal-
ment in the room and took the man
into custody. He gave the name of
James Lamonte.

Records reveal many crimes chalked
against Lamonte, police say. It is be-
lieved he intended harm against young
Markowitz, but lost his nerve.

FORTY OAK PARK HIGH EX-FRAT BOYS IN SCHOOL

Forty Oak Park High school boys
were jubilant yesterday as they re-
sumed their classes after having been
absent since last May, when they were
expelled for membership in fraterni-
ties. But, mindful of the agreement
under which they were allowed to re-
turn, there was no demonstration on
their part nor of their classmates.

Many others of the 33 had received
their diplomas this fall after being
denied them in June.
The reinstated students will be treat-
ed as are all others except that they
may not represent the school on the
athletic field nor in other interscho-
lastic activities until next May. Most
of them have already made up the work
they missed, and the others will be
given an opportunity to do so, it was
announced by school authorities.
After the boys were expelled they
started court action to regain their
seats and were successful.

Chicago's Largest Silk and Woolen Store presents

The New Fall Fabrics

This "Wondrous Upstairs Store" is not
merely a shop, but a large store where
are shown exclusive displays of better
grade SILKS, WOOLENS and VEL-
VETS.

Here you may shop in comfort . . . there
is plenty of light, ample space . . . you
may take all the time you wish to select
from the thousands of yards of beautiful
materials, effectively displayed.

Fall brings us many new, wonderful wool-
ens. The new deep pile and suede finish
fabrics and novelty coatings are enjoying
particular vogue this season.

Silks of the better grade . . . a lovely
collection of moires, satin crepes and flat
crepes in all the latest shades awaits your
selection.

Velvets, beyond doubt, will be the great
favorite for winter wear. We have a
very fine variety for both day and eve-
ning wear.

You will find Adler's prices consistently low
in keeping with our 26-year old policy.

BRIEF UPHOLDS ST. PAUL SALE AS FAIR TO ALL

Minority Protest Answered
in U. S. Court Here.

Battle lines of the majority bondholders of the Chicago, Milwaukee and St. Paul railroad were drawn closed yesterday with the filing of briefs and affidavits in Federal Judge James H. Wilkerson's court attacking the actions of holders of \$18,000,000 of bonds who are seeking to intervene in the ordered foreclosure sale of the road.

Two documents were filed by New York attorneys headed by John W. Davis, Democratic candidate for President in 1924, and the Chicago firm of Tenney, Harding, Sherman & Rogers. Announcement of the action was made by Judge Wilkerson, who said "a stack of papers a foot high" had been placed before him.

Jameison Charges Answered.
The briefs and affidavits were written as answers to charges and petitions filed Aug. 23 by Edwin C. Jameison as chairman of the so-called Jameison bondholders' defense company. Mr. Jameison attacked the Kuhn Loeb Guaranty Trust reorganization plan as unfair and in direct violation of the orders of the United States Supreme court, and asked that the upset price be set at not less than \$30,000,000 subject to the Puget Sound mortgage of \$150,000,000 and the refunding mortgage of \$20,000,000.

The major brief was written in behalf of the Guaranty Trust company of New York, as corporate trustee, and M. P. Callaway, as individual trustee, of the general and refunding mortgage of the railway company. An affidavit of W. W. Colpitts, of the engineering firm of Coverdale & Colpitts, New York, was filed with the trustees' brief. Mr. Colpitts' affidavit dealt with the application of the Jameison bondholders' committee for leave to intervene and also with an application of the trustees to fix the date of sale of the road and upset prices.

Against the total upset price of \$30,000,000 suggested by the Jameison committee, Mr. Colpitts contrasts an estimate of \$119,161,423 as the theoretical value of the properties involved, but adds that the latter amount is high from the standpoint of a purchaser at foreclosure sale.

Minority Charges Answered.
The trustees' brief says in part: "It is denied by the trustees that in the institution and conduct of the foreclosure proceedings they are acting under instructions from the reorganization managers of any plan or agreement of reorganization or under instructions from any of the bondholders save under the provisions of (Judge Wilkerson's) final decree. "It is further denied that any action taken by the trustees has been for the express purpose of enabling the reorganization managers under any plan or agreement of reorganization to

WOMAN DISROBING NEARBY, BUT HE WAS TOO ILL TO LOOK

Thomas Pollos, a waiter, 1353 West Harrison street, was a very sick man when he was seized by the police in an alley in the rear of 1107 Loomis street Saturday night, he told Judge Herbert G. Immerhausen in night court last evening. He was arrested on a charge of disorderly conduct.

"I had an awful headache, judge, when the policemen seized me," Pollos said. "I could hardly stand up and was leaning against a fence moaning when I was grabbed."

"Yes, I guess there was a woman disrobing in the flat across the way, but I was too sick to see anything. I didn't even see the police."

He was discharged.

bid in the property embraced in the general and refunding mortgage or dispose of the same under the terms of any plan or agreement of reorganization.

"Certainly the compliance by trustees with the request of more than 80 per cent of the outstanding bonds to ask the court to fix the date of sale and the minimum bid or upset price at which the property shall be offered for sale does not constitute a control of the action of the trustees, nor does it constitute such direction to support the charge made by the petitioners that the trustees are no longer in a position to act impartially for the

benefit of all the holders of the bonds secured by the mortgage."

After discussing various charges which have been made against the trustees, the brief goes on: "Nowhere among the charges is to be found a charge of fraud, dereliction or conflict of duty upon the part of the trustees."

"It has long been the settled rule that minority bondholders in the absence of any proof of fraud or unfairness will not be allowed to interfere with the action of the trustees taken in the interest of and for the benefit of all of the bondholders whom he represents."

Calls Charges False.
Mr. Colpitts, in his affidavit, says: "It is absolutely untrue that the board of directors of the Chicago, Milwaukee and St. Paul company authorized the employment of my firm to prepare a report which could be conveniently used by Messrs. Kuhn, Loeb & Co., the National City company, the bankers of the railway company, in justification of their alleged intended action in precipitating a receivership and a reorganization."

It was intimated at the time the Jameison affidavit was filed that if intervention were not allowed Mr. Jameison would head a syndicate which will be prepared to make a cash bid for the property. This, it was pointed out, would make a foreclosure sale an actual bidding proposition instead of a formal procedure.

Prices realized on Swift & Company's sale of carcasses head in Chicago, for week ending Saturday, Sept. 11, on shipments sold out were as follows: Cows, common to good, 8.00 cents to 13.00 cents; Steers, common to medium, 12.00 cents to 18.00 cents; Steers, good to choice, 16.50 cents to 19.00 cents; total sales averaged 14.01 cents per lb.—Adv.

SUE TO ENJOIN STARVATION DIET BOOZE PENALTY

(Picture on back page.)
Tekamah, Neb., Sept. 13.—(AP)—Deploring an issue of life and death at stake, application for a temporary order restraining the Burt county attorney and sheriff and the state of Nebraska from keeping Roy Carson, farmer liquor law violator, in jail on a bread and water diet, was filed in District court here today. Hearing on the application is set for Wednesday.

The action was filed by Attorney R. C. Hunter, Omaha, who was employed to defend Carson by J. H. Chaff, brother of County Judge Orville Chaff, who imposed sentence. In it Hunter said "the sentence conflicts with the universal constitutional rights."

Nuns Fined for Carrying Smuggled Lace; Released
St. Albans, Vt., Sept. 13.—(AP)—Four nuns detained here by customs officials since Saturday, when they were found to be crossing the border with rare lace valued at \$5,000 sewed in their clothing, were released early this evening on payment of a \$4,000 fine to Collector of Customs Harry C. Whitehill.

Sept. 16 at 6:15, Lyon & Healy Hall
Tel. Rogers Park 0234

Prices realized on Swift & Company's sale of carcasses head in Chicago, for week ending Saturday, Sept. 11, on shipments sold out were as follows: Cows, common to good, 8.00 cents to 13.00 cents; Steers, common to medium, 12.00 cents to 18.00 cents; Steers, good to choice, 16.50 cents to 19.00 cents; total sales averaged 14.01 cents per lb.—Adv.

KANSAS RIVERS GO ON RAMPAGE; TAKE FIVE LIVES

(Picture on back page.)
Emporia, Kan., Sept. 13.—(AP)—Floods and storms in southeastern Kansas had taken a toll of at least five lives late today, inundated several towns, wrought damage as high as \$4,000,000 and made scores homeless. Wire communication was hampered and traffic on some main and branch line railroads impeded.

Torrential rains Sunday in the water sheds of the Neosho, Cottonwood and Verdigris rivers put those streams on the rampage and there was heavy loss of live stock and enormous crop loss as the flood swept southeastward.

A few miles below here the Cottonwood river was four miles wide today, alfalfa fields were flooded so deeply that the stacks appeared like islands.

ON THE TRAIL OF TREASURE

In a Forgotten Corner
of Old Florence

—hidden beneath the dust of centuries—this exquisite Bolognese Credenza was uncovered.

Original and faithful reproductions of period credenzas, letterers, cassoni, cabinets, and an occasional Stipo A Bambocci—a group of ever-interesting pieces in chestnut, walnut, cypress, beechwood—comprise the newly-arrived Hoops presentation.

The present showing is replete with splendid examples of rare craftsmanship of former ages and reproductions of modern times.

Order from Horder's More Than Just Stationery Stores

Perhaps you have thought of Horder's just as rather conveniently located stores, with stocks kept more complete than you might find elsewhere—a good place to "get what you want when you want it."

Horder's actually covers a much broader field of useful activities. An experienced staff of business equipment specialists is maintained for your service without cost.

They are available to consult with you not only about office equipment but business operations, accounting problems, short cuts which may save you money. Horder's staff is familiar with almost every detail of modern office operation, and will aid you in saving money rather than in needless expenditure. Feel free to consult us at any time.

Horder's are far more than just stationery stores. Horder's carry in regular stock over 12,000 separate items for office and business use. Every item whether it be a five cent pencil, a single sheet of carbon paper or a complete bookkeeping or filing system for a corporation has been bought for resale to you, only after Horder's buying staff is satisfied as to its quality—its actual usefulness in business and that it represents a real dollar value to you at its price.

Horder's buyers operate on the idea that they are in fact your agents—your interests are theirs. Horder's buyers and salesmen are in constant touch on your Office Supply problems.

To insure our city customers receiving prompt and efficient service we maintain 94 telephone lines, operated from a central switchboard; messenger boys are at each store and a fleet of auto trucks cover the city. Mail orders are filled and shipped the day they are received. Horder's can supply everything for business from a sheet of blank paper to complete office furniture. It will pay you to get better acquainted with Horder's.

Have you a Horder Catalog on your desk?

SAFETY CRUS LEADER, FIAM KILLED BY T

Auto Deaths in
Mount to 572

(Picture on back page.)
Al C. Parker, manager of the Aurora Automobile club, many years in a campaign for grade crossings, was instantly killed yesterday and his fiancée, Miss Elgin, was injured, when the automobile they were riding was struck by a crossing in Morris street.

Parker was 52 years old, long associated with the club, and was a member of the organization. The school boy was killed in a collision with a car. The car was driven by a woman, Miss Elgin, who was also injured. The car was struck by a crossing in Morris street.

Three Deaths in Crossing
Four deaths were recorded in automobile accidents in Chicago during the day. The 1926 car was raised to 572.

Mrs. Pauline Jacobs, 27, of 315 North Dearborn, was killed in a collision with a car. The car was driven by a woman, Miss Elgin, who was also injured. The car was struck by a crossing in Morris street.

After George N. Wagner, 147 North Menard avenue, was killed in a collision with a car. The car was driven by a woman, Miss Elgin, who was also injured. The car was struck by a crossing in Morris street.

Arthur Stahl, 35 years old, died in the County Jail. He was killed in a collision with a car. The car was driven by a woman, Miss Elgin, who was also injured. The car was struck by a crossing in Morris street.

Child Dies in Mother's Arms
Joseph Humphrey, color, died in his mother's arms. He was killed in a collision with a car. The car was driven by a woman, Miss Elgin, who was also injured. The car was struck by a crossing in Morris street.

SAFETY CRUSADE

LEADER, FIANCEE

KILLED BY TRAIN

Deaths in County
Mount to 572.

(Picture on back page.)
C. C. Parker, manager of the Elgin
Automobile club and leader
many years in a campaign to abol-
grade crossings, was instantly killed
and his fiancée, Miss Ione B.
also of Elgin, was fatally in-
when the automobile in which
were riding was struck by a
at a crossing in Morris, Ill.

Parker was 53 years old. He was
associated with the automobile
movement, being credited with
the school boy patrol which
been copied in many cities. He
was formerly connected with the Chil-
dren's and Medinah auto clubs.

Three Deaths in County.
Four deaths were recorded as due
automobile accidents in Cook county
the day. The 1926 motor toll
was raised to 572.

Mrs. Pauline Jacobs, 27 years old,
Clybourn avenue, a sister-in-law
Johnnie Torrio, noted for his gang-
connections, was fatally injured
this morning when an automo-
in which she was riding with C. J.
2713 North Robey street, was
by another machine at Lake
Halsted streets. Mrs. Jacobs
taken to the Iroquois Memorial
hospital, where she died. The license
of the car which struck the machine
which Mrs. Jacobs was riding was
to E. J. Hamratty, 1734 North
Cass avenue. The driver of the
car, as did Shaw, and both are
by the police.

After George N. Wagner, 23 years
old, 141 North Menard avenue, died of
he received in an accident
night, two drivers were held
police. Wagner was riding in an
automobile driven by Van Eismen, 23
years old, 132 North Menard avenue,
which crashed into a car driven by
Kvist, 17 years old, 1425 Winona
avenue.

Another Stahl, 35 years old, 732 Rees
street, died in the County hospital of
he received when he slipped
a truck upon which he was work-
ing and was run over.

Child Dies in Mother's Arms.

Joseph Humphrey, colored, 3 years
old, died in his mother's arms after
he had grabbed him from a hospital
and taken him home. The boy
was knocked down by an automobile

at 2230 South Dearborn street. He was
taken to a hospital. The mother fol-
lowed, seized the child and was carry-
ing him home when he died.

Samuel Berman, 316 Sunnyside ave-
nue, a representative of a clothing
establishment, died at Johnstown, Pa.,
as the result of a fractured skull sus-
tained when his automobile left the
Lincoln highway near Stoyestown, Pa.,
and was wrecked.

Three Chicago women were injured,
one perhaps fatally, in an auto crash
at Milwaukee. Mrs. Susie Higgins, 35,
wife of the Oak Forest chief of police,
suffered a fractured skull when the
auto in which she was riding turned
turtle twice after it crashed into a car
driven by Nick Boehm of Milwaukee.

Mrs. Mary Holland, 2689 South Ridg-
way avenue, suffered a broken arm,
and Mrs. Agnes Levy of Oak Forest,
driver of the auto, was bruised.

DIES AFTER SHOOTING SELF.
Stephen Wohlmut, 42 years old, 1556
North La Salle street, who shot himself Aug.
26, died at the county hospital yesterday.

16 U. C. SAVANTS WRITE STORY OF SCIENCE AND LIFE

Volume, Out Soon, Lays
Stress on Evolution.

BY PHILIP KINSLEY.

In an effort to orient the college mind, lead the public consciousness into an enlightened concept and control of evolutionary processes, and outline the great story of modern science, sixteen of the ranking scientists of the University of Chicago have collaborated in the writing of a 400 page book called "The Nature of the World and of Man." The volume is soon to be published by the University press and will be supplemented this winter in a program of downtown lectures.

Each of the scientists was limited to 10,000 words in giving the fundamentals and the latest conclusions in his field, but the remarkable thing is that the book has taken on the unity, the coherence, the march, and the great scope. The secret of this may be found in the statement stressed in the book that the basis on which science rests is the orderliness of the universe.

Much Evolution in Book.

The world as looked upon by the chemist, the invisible and microscopic, and the infinite galaxies of stars found by the astronomer, are ruled by the same laws and have the same basic content. One of the writers finds in this a source of profound spiritual inspiration, but the philosophical view of it all is not presented, except as it has crept in.

This book deals entirely with what may be called describable facts. It presents hypotheses, such as evolution and the planetesimal theory of the earth's origin, but discusses them only in the light of proven facts.

There is much about evolution. In fact, the book might have grown from conversations held in Dayton, Tenn., a year ago in the house where the scientist witnesses in the Scopes case gathered to plan the defeat of the late apostle of special creation and fundamentalism. This is emphasized more than any other feature in the book, giving

AUTOMATIC CONTROL OF TRAINS TO COST PENN. R. \$8 MILLIONS

The Pennsylvania railroad has announced an \$8,000,000 program by which automatic train control and other additional safety devices will be installed on 1,150 locomotives and about 1,500 of its 14,000 miles of main tracks. These devices virtually are to eliminate human mistakes, and make certain the avoidance of accidents, it is as effective as hoped, the use of the device probably will be extended.

The locomotive cab will contain duplicates of the usual signal lights by which the train operation is controlled when they are read by the engineer. But when these signals change along the right of way the color of the duplicate lights in the cab will change accordingly, and a whistle inside of the cab will call the attention of the engineer to the fact of change. Should the engineer and fireman fail to heed danger or caution signals, the automatic device will stop the train. That device is known as the stop and "forewarn" and will set the airbrakes. This device can only be released from within the cab, thus showing whether the engineer has acknowledged the fact that the track ahead was not clear.

argument to that group of fundamentalists who have charged that a plot to lead the youth of the middle west away from the Bible into the dangerous field of modernism.

But there is something left for the old point of view. Beyond the world of facts, so-called, the existence of another rational world is hinted.

Man Is Found an Animal.

This has been called the world of appreciations, the inner world of ideas, in which man transcends time and space. Philosophy calls this inner world reality, and all the things which science deals with, the show world. So in this fourth dimensional atmosphere the vitalists and literalists may find comfort. But they will find little in such paragraphs as this, by Prof. Fay Cooper Cole, famous anthropologist:

"No modern race is without evidence of its animal ancestry. Modern man still shows his close relationship to the anthropoids at every stage of his development from the beginning of his embryological life to his adult form. All evidence points to the fact that man is an animal, and

that, like all other animals, he is subject to the effect of environment, to variation and mutation, and to the same laws of descent." Prof. Hearn Hackett carries on this theme.

View of the Heavens.

The book opens with a view of the heavens. This chapter by Prof. Forest Ray Moulton shows how science has placed the earth as a speck, in the solar system, how the laws of the solar systems have been discovered, the earth weighed and measured, the chemical constitution of sun and stars determined.

The origin and early stages of the earth are discussed by Prof. Rollin T. Chamberlin, whose father, Prof. Emory T. Chamberlin, with Prof. Moulton, put forth the planetesimal theory, which has replaced the Laplacean hypothesis as to the birth of the family of planets. The growth of the earth and the beginnings of life come in this section, which is followed by the march of the physical processes by Prof. J. Harlan Bretz.

The age of the earth is shown to be about one billion, five hundred million years. Land surfaces in the Grand Canyon of Arizona show an age of seven hundred million years.

From this the story passes to a consideration of energy, radiation, and atomic structure by Harvey Brace Lomon. All is manifestation of en-

A Leader in the Industry
Since its first appearance eight years ago, the Hardinge has always taken high rank in the industry. It is made with almost the precision of a watch, yet it is in no way complicated in operation.

Guaranteed for Ten Years
Because of the results of the most severe tests to which the Hardinge has been subjected, we are now furnishing with each burner sold by us a ten-year guarantee.

From Bungalow to Skyscraper
The Hardinge burners are made in 22 different combinations of sizes from which a selection may be made to heat any building—from the small bungalow to the mammoth skyscraper. The Hardinge is now operating with marked success in all types of both domestic and industrial buildings—churches, schools, theaters, garages, apartment buildings and houses.

Sootless, Smokeless, Odorless
The Hardinge does not throw out any soot. It is smokeless. With perfect combustion, all oil and gases are burned in the first box, instead of going up the chimney as smoke or soot. There are no odors. The Hardinge is quiet in operation.

The Company Behind the Burner
Hardinge Brothers, Inc., are more than a third of a century old. Their products are known and used throughout the world, and the company stands solidly behind every Hardinge burner sold.

A Hardinge for Every Building and Every Purse
Because of the wide range in sizes of the Hardinge, there are burners adaptable to all buildings—and because they are so economical in operation, there is a Hardinge for every purse.

Small Down Deposit—Balance in Easy Payments
Do not longer deny yourself the comforts of the Hardinge—clean basement, no ashes to carry out, a generous supply of heat, automatically supplied if you wish a summer warmth in your home when it is even "way below zero" outside.
In order that these comforts may be supplied to all, you may make a small down payment and the balance arranged in terms to suit your convenience.
The Hardinge is adaptable to any building and is listed as standard by the Underwriters' Laboratories and approved by the Board of Standards and Appeals of New York.

ergy. Light rays, heat waves, the new cosmic rays, signals of mysterious phenomena taking place in the universe around us, the way in which men have employed some of these forces, lead to this suggestion:

"Unless simultaneously with the control of nature's forces we learn to make proper use of our leisure time, we may find ourselves in the position of many other civilizations whose perverted activities have resulted in their ultimate decay and total disintegration."

The nature of chemical processes is given by Julius Stieglitz. The whole universe, stars, and animals and in- dustry, consists of two kinds of mat- ter—elements and compounds. In the transformation of matter lies the health, safety, comfort, the story of medicine, and of the great industries.

Prof. Newman goes into the nature and origin of life, emphasizing the basic oneness of all science. As to life creation he writes:

"The fact that man has not suc-

ceeded in making a new living organism nor observed the spontaneous generation of life in nature does not drive us to a supernatural origin of life. We are frank to admit that as yet we do not know just how, when, or where life began on this earth, but we are not yet ready to abandon hope of the ultimate scientific solution of the problem."

Life's Smallest Manifestation.

Edwin O. Jordan tells of bacteria, the smallest manifestation of life, friend and foe of man.

Merle C. Coulter writes of the evolution of the plant kingdom, another story of progress from the simple to the complex, generalization to specialization.

Henry Chandler Cowles writes a chapter on interactions between plants and their environment. W. C. Allee contributes to the evolution of the in- vertebrates. The primitive plant animal divides into the plant kingdom of today, mammals (where man belongs),

and insects. Then comes the evolution of the vertebrates by Alfred S. Romer, the roots of the tree of life, it is shown, going down from birds, whales, elephants, and man to the lower chordates.

Prof. Cole gives the story of pre-historic man, pieced together from med- iumary evidence, and follows with a discussion of racial characteristics.

Prof. Newman writes of the factors of organic evolution. The causal factors he finds to be variation, heredity, selection and isolation. Elliott H. Down- ing takes up the subject of human in- heritance.

George W. Bartleson writes of man from the point of view of his develop- ment and structure. He finds the di- rection of progress in the improvement of social relations. The greatest progress is to be looked for through the labors of the "sporadic genius." Anton J. Carlson writes of the dynamics of living processes, and the book closes with a chapter by Charles Hubbard Judd on mind in evolution.

Distinctions

You have heard the thin, wiry toned piano. You have listened to the strident, metallic toned piano, that offends your ears with its penetrating twang. You have heard the heavy, dull, thick-toned piano that lacks resonance and charm. When you hear a piano with a rich, vibrant tone, deep and sonorous, entirely lacking in metallic quality, the chances are you are listening to a

because those are the qualities which distinguish it from all other instruments, The Chickering TONE is found only in the CHICKERING Piano!

Hear it and you'll understand what we mean,
BISSELL-WEISERT
26 SOUTH MICHIGAN AVENUE

SUPERIOR 2173

REMEMBER that number! By calling it you will be placed in touch with the Show Room and Sales Office of the Hardinge Fuel Oil Burner.

Recently the sales of the Hardinge burners have been taken over by the manufacturers, who will sell the burner direct to the public in Chicago territory.

Hardinge Brothers, Inc., will also supervise the installation and service of all their burners which will be sold in this territory.

Our new telephone number—Superior 2173—was assigned to us too recently to appear in your present telephone directory, but it will appear in the next one.

We are now conducting business in our spacious show room and offices at Michigan Ave. and Ohio St.—but our formal opening will soon be announced in this newspaper.

—Watch for It!

MANDEL BROTHERS MEN'S SHOPS

Tailored by hand, under our close supervision
"The Glenkirk", \$50
A single-breasted, two-button smooth rolling peak lapel coat, with no back vent. A trifle loose and short—a style now preferred by the most careful dressmaker. To be had in a variety of unusual Fall colorings.
"The Bradford", \$45
This double-breasted model achieves the double distinction of a loungy effect and an athletic appearance, due to the wide peak lapels and the shoulder and neckline. Widely admired and worn by younger business men, it gives the youthful effect to those of more mature years. In both conservative and more daring patterns.
Both suits with two pairs of trousers.
Second floor, Wabash.

How to Choose Your Oil Burner:
Turn a deaf ear to salesmanship. Get a list of actual owners. Visit several at random. See their burners in operation. Compare fuel costs, heating efficiency. This sort of shrewd, thrifty buying has put hundreds of Lammert Oil Burners into homes, apartments, churches, hotels, and factories.
Our distributors everywhere will gladly tell you where you can see installed Lammert Oil Burners. Telephone Seely 0383 for information. No high pressure selling.

BARRETT & WET PLAN COOK CO.'S

Republican pro- economy and a re- vision of the Volstead act with Charles V. Barrett as county committee will to set the convention the prosperity and The Republican party, he said, will de- prohibition law and opposition to Ameri- the world court. With George E. cratic national com- nominee of his party

BARRETT CUTTING WET PLANK FOR COOK CO.'S G. O. P.

Republican prosperity, Coolidge economy and a resounding whack at the Volstead act will be the highlights of the Cook county G. O. P. fall convention, according to County Reviewer Charles V. Barrett and others. The county committee will meet Thursday to set the convention date and shape the prosperity and wet planks. The Republican party in Cook county, he said, will declare for a modified prohibition law and will reaffirm its opposition to American adherence to the world court. With George E. Brennan, Democratic national committeeman and nominee of his party for United States

senator laid up with an injured knee at St. Joseph's hospital, the Democratic state committee decided yesterday to have a flying squadron of speakers cover the state for him. Mr. Brennan will be one of them. Others are to include Mayor Dever, Frank D. Comerford, Bruce Campbell, and Douglas Pattison, veteran Democrats, and John Kjellander, Republican, a former federal prohibition director for Illinois who has come out for Brennan on the wet issue. Mr. Barrett, outlining views, he intends to present to the G. O. P. county convention which probably will be held before Oct. 1, said: "The Volstead act has brought about such a condition of affairs in every large community that in our opinion it is imperative modification be effected immediately to permit the manufacture and sale of light wines and beer. Prohibition has not brought temperance, but reawakened the fanaticism and intolerance of the past centuries." Mr. Barrett added, "We as Republicans are proud of the unbounded era of prosperity this nation has enjoyed under Republican administrations and we should urge the voters to continue that prosperity by supporting the Republican party."

CHIROPRACTOR IS ARRESTED AFTER DEATH OF TWO

Joseph J. Rein, chiropractor, of 8325 West Grand avenue, was arrested last night by John W. Follmer, chief inspector for the department of registration and education, following reports that two boys died in July while under his treatment.

The charge against Rein was that he administered to Joseph Prestilash, 5 year old son of John Prestilash of 2641 North 74th avenue, Elmwood Park, for mastoids, and to Raymond Pfeiffer of 2537 74th avenue for appendicitis.

Rein was arraigned before Police Magistrate Owen McInnessey of River Grove, charged with practicing medicine without a license. He was held under \$1,000 bonds and his trial set for Sept. 22. Rein claimed he gave the boys medicine under the directions of a medical doctor.

PHILIPPINE BILL AGAINST CURSING AIMED AT YANKS

(Chicago Tribune Press Service.) MANILA, Sept. 12.—Representative Lupe Biting of Ilocos Sur today introduced into the house of representatives a bill prohibiting any profanity within the territorial boundaries of the Philippine islands, under penalty of \$25 fine or a week's imprisonment, with increasing penalties for further violations. Mr. Biting pointed to Italy as an example, where there is a movement on foot to prevent the taking of the Creator's name in vain.

Whether the bill will affect the Mohammedan and pagan tribes is uncertain, as the Moslems swear by Allah or the beard of this prophet or by Gov. Gen. Leonard Wood, while the Igorots and other hill tribes use the names of heathen deities.

It is believed Mr. Biting had in mind the American soldiers and sailors, and other American residents, most of whom came to the Philippines in 1898 and who have been cursing themselves ever since.

It's the cut of your clothes that counts

It's the Topcoat for Fall—
the SAVOY by
Society Brand

Society Brand Topcoats
\$45 to \$65

Buy on the
Lytton Budget Plan
You can buy a Society
Brand topcoat with a
small initial payment, the
balance over ten weeks.

Perfect ease! That's the idea in the new topcoat for Fall. Note the loose drape and thorough comfort of the lines in this model. And the air of distinction. It takes the Society Brand cut to give the right effect; and here it's at its best. We doubt if you'll see any other coat that has so much character. You can get the Savoy in a wide selection of new exclusive fabrics. Rich weaves and colors.

High Priced, Yes—
But It Is the Finest
Coffee That Can
be Produced

INSTANT approval for AREX Culture-Ripened Coffee—the greatest discovery of an age! From every source has come immediate acceptance—enthusiastic praise—unqualified recommendation. In clubs of quality; in the finer hotels; in homes where the hostess "does things well"; on the tables of thousands who love real coffee, but who have been forced to give it up—you will find this new and different coffee.

New Coffee Delight at a
Penny More a Cup!

Higher priced—but not expensive—is this coffee with the fine old-time Java flavor. What real lover of coffee wouldn't pay a penny more a cup for this new delight! For here is a richer, fragrant, more satisfying drink—a coffee that everyone may drink with safety.

No Unpleasant After-Effects
from AREX

What a treat for those who like coffee but can not drink ordinary coffee without unpleasant after-effects. The remarkable new culture-ripening process scientifically ripens the coffee, eliminating the elements that cause "wide-awakeness," nervousness and other ill-effects. Doctors recommend this fully ripened coffee.

It's REAL Coffee!

Culture-ripening is the secret—the triumph of years of experiment and laboratory work by scientifically trained coffee men. It is real coffee—not a substitute—the finest coffee that nature and science can produce.

PROHIBITION BIG ISSUE IN TWO PRIMARIES TODAY

Klan Furnishes Feature in Colorado Vote.

Nine states will hold primaries today for national or state offices. Some of the contests are of vital importance to the whole nation as they will be fought out on the issues of the world court and prohibition. In others, the contests will involve widely different issues such as pardons and pardons and the Klan.

In one state—Maryland—a potential candidate for president is to be tried out. Albert C. Ritchie is running again for governor and his showing may decide whether or not he is to be the Democratic standard bearer in the national campaign in 1932.

The states where the primaries are to be held and the issues involved follow:

WASHINGTON—United States Senator Wesley L. Jones is seeking re-nomination as a Republican. He is a dry and a world court advocate. Frank E. Hammond of Seattle is running as a wet. Austin H. Griffiths and Leroy Henry also are candidates. On the Democratic side, A. Scott Bullitt, opponent of the world court is contesting with two men, George E. Cotterill and Cleveland Longstreet. One member of congress—J. P. Miller, Republican—faces a contest with James McCabe, a wet, and H. A. Moore. Congressmen Hadley and Summers, Republicans, and Hill, Democrat, are unopposed.

MARYLAND—Gov. Albert Ritchie, the only Democrat to serve two terms since the civil war, seeks re-nomination. He is opposed by William N. Maloy, John Philip Hill, Republican representative, who defied the prohibition forces to put him in jail for making potable liquor, is a candidate for United States senator.

LOUISIANA—The Democrats will vote on prohibition. Senator E. S. Brasseur, an out-and-out wet, is again a candidate. He is opposed by J. Y. Sanders, former governor, who urged a state referendum on liquor. One congressman is opposed. He is J. Z. Spearing of New Orleans.

MICHIGAN—The battle centers on the nomination for governor. Fred W. Green, former mayor of Ionia and for many years head of the Ionia state

penitentiary, heads a faction of the Republicans who seek to defeat Gov. A. J. Groesbeck and the "state ring." The Green fight is based on Mr. Groesbeck's record on pardons and paroles. The Green people say the parole board has loosed 8,000 convicts in the governor's time in office. William A. Comstock is unopposed for the Democratic nomination for governor.

NEW YORK—The prohibition issue, which threatens to cause a clash in the Republican state convention, will be fought out by three upstate Republican dry congressmen.

SOUTH CAROLINA—The world court issue is involved in the "run-off" primary for Democratic nomination for United States senator. Ellis D. Smith, incumbent, is opposed by Edgar Brown, who made his campaign on Smith's vote for the world court. One congressman, H. P. Fulmer, 7th district, faces opposition by Ernest M. Dupree.

COLORADO—The Klan is the main issue. Senator R. W. Means, reputed

Klan leader, is seeking the Republican nomination for reelection. He is supported by United States Senator L. C. Phipps. Opposing Means are Charles W. Waterman and Judge George A. Luxford. The Klan issue also enters the Republican fight for nomination for governor. Oliver H. Shoup is the anti-Klan candidate.

MASSACHUSETTS—The fight centers on members of congress. For senator, Senator William M. Butler, Republican, and former Senator David J. Walsh, Democrat, are unopposed. For governor, Alvan T. Fuller, Republican, and William A. Gaston have no rivals. All of the present congressmen are seeking re-nomination for another term. All but three are Republicans.

VERMONT—The Coolidge administration will suffer one set back as Senator Porter H. Dale is assured of the Republican nomination for United States senate. James E. Kennedy is unopposed for the Democratic nomination. The Republicans are having contests for governor, one of the seats in congress and lieutenant governor.

CANADA ELECTION CAMPAIGN ENDS; WILL VOTE TODAY

Ottawa, Canada, Sept. 13.—(AP)—In a last burst of oratory the leaders and candidates of the two principal political parties in Canada closed their election campaign today with a final appeal to the voters to turn out and cast their ballots tomorrow. Both sides expressed confidence in the success of their respective parties.

Arthur Meighen, premier and leader of the conservatives, said: "The conservative party will have in the new house of commons a clear majority over all other groups combined."

Former Premier W. L. Mackenzie King, leader of the liberal opposition, speaking at Pembroke, said that "Mr. Meighen's chances are gone completely." Mr. King predicted for his party a solid Saskatchewan, a virtually solid Quebec, and a heavy gain in Ontario.

Tomorrow!

A city of 100,000 is moving to Chicago

What Does This Mean to You?

"Reality surpasses imagination," said Goethe, and how truly that applies to the marvelous and continual growth of this city. Chicago is gaining 400,000 population yearly—every year. Think of it—in five years it adds to itself a population greater than that of New Orleans, Indianapolis, or Minneapolis. A city of 100,000 people is moving to Chicago this year. What will we do with them? How many homes, how many stores, theatres, banks, hotels and apartment houses will be required to accommodate them, and to accommodate the next hundred thousand—and the next?

Will you own land that builders must buy?

Public utility companies, the telephone, transportation, light and power companies, financiers and subdividers are investing millions of dollars in anticipation of the increased real estate values that this population is bringing. And now Wm. H. Britigan has bought the only available undeveloped large tract within the city, in the heart of the North Side, and completely surrounded by some of the city's finest apartment and business developments—in a community that has stores, theatres, banks, schools, churches and excellent transportation NOW.

Owing to peculiar circumstances this tract, a part of an estate, has been withheld from the market for years, while the city has grown up all about and far beyond it. It is located on the North Side—two miles within the city limits—only seven and one-half miles from the loop, as close as the Edgewater Beach, and includes frontage on one of the North Side's longest, busiest, and most valuable business streets.

Here, shortly, Mr. Britigan will offer City lots with all improvements at subdivision prices—How he can do this—Why this property was held intact while the city grew up about it—All these facts are obtainable in advance—and remember this—the way to make money in real estate is to know the facts soon enough. Send the coupon now—there is no obligation—it will bring you the facts.

HEALTH FAILING, NOTED ARCHITECT KILLS HIMSELF

(Picture on back page.)

George W. Maher, an architect who specialized in designing model cities and villages, killed himself early Sunday at his summer home in Ganong, N.H. It was learned yesterday.

Dependence over ill health, which several years hindered his work was named by the coroner's jury which returned a verdict of suicide. Maher, complaining of a headache, had left for a walk and his wife followed in a few minutes. She found his body in their garage; a revolver was clutched in his right hand.

Was Architect of Kenilworth. The architect who laid out the village of Kenilworth and Glenbrook, built numerous "show place" houses along the north shore, and was consulting engineer to the Kenilworth planning commission, was born Dec. 25, 1864, at Mill Creek, W. Va. He studied architecture in Chicago and later in Europe, starting work here in 1888, gradually specializing in residences, memorials, city and village planning. At Kenilworth he not only laid out the village, designed and built the schools and churches, but donated the public park. He was trustee of the Kenilworth board in 1906. He accomplished similar work in Glenbrook and Evanston, building the homes of James A. Patten and George B. Dryden and the Patten gymnasium of Northwestern university.

Mr. Maher was a fellow in the American Institute of Architects and served that organization as president of the Illinois chapter in 1918.

Last Work Was at Gary. His last work was at Gary, where he helped draft the planning code and opened the gateway into the city.

In 1925 his health began to fail and he suffered a nervous breakdown in 1922, the result of overwork.

GIESEKING AT HIS BALDWIN

Be guided by the world's great pianists

None are better able to judge and compare piano tone quality, resonance and responsiveness than are artists such as De Pachmann, Bachaus, Gieseking, Carreras and many other famous pianists who have unanimously chosen and endorsed the Baldwin. You could ask no safer guide in making your own selection.

Our generous allowance for old pianos and convenient budget plan are two of many features of Baldwin service designed to insure your permanent satisfaction and pleasure. Call at Chicago's foremost exclusive piano establishment for full information.

MOVE FOR A NEW SACCO-VANZETTI MURDER TRIAL

Dedham, Mass., Sept. 13.—[Special.]—The latest attempt to save the lives of Nicola Sacco and Bartolomeo Vanzetti, found guilty in 1921 of a double murder, was made today when counsel for the defense petitioned Judge Webster Thayer for a new trial for the convicted radicals.

Attorney William G. Thompson read and filed the confession of Celestino F. Madeiro, another condemned murderer, that he and members of a gang of bandits killed Paymaster Frederick Parmenter and his guard, Alessandro Berardelli, at South Braintree in 1920.

PEOPLE

or 300 words. Give full name and address. Address Voice of the People.

TELLING THE CHILD.

ago, Sept. 12.—In this morning's edition of the People, a foster mother asks me to let the child, born out of wedlock and now six years old, know the truth concerning her adoption and birth. Instances are rare when the fact of adoption is not at some time revealed to the child; it cannot be well kept a secret. The procedure by which the child was adopted is amalgamated to the family, is through a court of record. There is no guarantee of privacy. Numerous cases are brought to my attention in which the efforts of the parents to keep the child in ignorance have been futile and in which the child has bitterly resented the deception. Only the truth will ultimately prevail and lead to the best possible results.

The child is too small to remember its parents, it would be well for the mother, when the child is very young, in a confidential moment to quietly tell the child, "Mother didn't have a little girl, and so God sent you to me. Now I am your mother and you are my own little girl." Something in the nature of this is the procedure that is necessary. The child is easily satisfied. It is not necessary to supply details. The child grows up with the adopted father and mother as its own. In our observation the happiness of adoption in a well-ordered home does not at all diminish the affection or the love of the child for its parents, and the foster parents are free from the anxiety which comes from the fact that some day some one will

child to discover in young manhood or young womanhood for the first time the fact that he somewhere has a mother and a father who no longer care for him, creates a shock of terrible magnitude. The knowledge of the details of adoption are not essential to the child. The consequences of deceit are attended with danger to both child and parent.

C. V. WILLIAMS, President Illinois Children's Home and Society.

WAIT TILL SHE'S 16.

ago, Sept. 10.—The inquiry in this issue of the People as to what they should do with the little girl they adopted, her parents, stirred me deeply. Her now would break her spirit because she is unable to comprehend why other children should have a mother and father while she is just a girl. It would certainly cause her to brood with undoubted dire

should not be told until she is at least 16 or 18 years when she will be old enough to understand. However, you are sure that the knowledge of her mother was will never be to her through any one else. All her of this. Just think what that would be to carry through. She would develop a keen sense of superiority and the fear that she may not be loved. Rather have her think she is dead. experience, a boy, under similar circumstances, became mentally unbalanced. He spent a number of years in an asylum because he brooded about the thought that he had been deceived. It was a terrible tragedy. I V.

FILIPINO AMBITIONS.

ago, Sept. 10.—In today's issue of the People, there is a cartoon about "Filipino Independence." It really misrepresents those Filipinos who are honestly for the liberation of their country. It is the ardent desire of every Filipino to see his country free from the south, enjoy as much freedom as his northern neighbors. I am sure that some Americans that are free, the Christians will colonize their Mohammedans is absurd. They seem that we are all Filipinos, but the same stock (the Malay) that we have common customs, except that our religion is different. I am sure that we have a different religion as advanced in civilization. JOHN G. BURNS.

BURBANITE

ending, then?" that we hadn't the heart and potatoes."

Bottom Prices on Our New "Special" Furnaces

We are taking a new advantage of our great Holland Organization, and the most efficient furnace factories in the World. We are now producing furnaces to compete in price with the lowest priced furnaces on the market.

Our Specials are made of the same materials as the Holland and where price is the consideration, we challenge the world to compete.

Ask a Holland Man for prices in the various sizes!

Maybe your heating system is a healthful one - Maybe

Very few things in this world are so rugged that they cannot be abused. The finer they are, and many times the more useful they are, the easier it is to abuse them.

Health is an excellent example.

The least you can do for your family's health is to live in a healthful atmosphere.

And a healthful atmosphere means air that is clean, air that is circulated, and an abundance of oxygen and humidity.

Steam, Hot-Water, and Vapor Systems Lack Humidity

Sufficient humidity is rarely found in homes heated by Steam, Hot-Water or the so-called vapor systems. And the old-fashioned "hot-air" furnace is often worse.

Many of these houses are several degrees dryer than the Sahara Desert. America's most eminent doctors testify that this is so. The relative humidity is seldom 50% of what it should be.

And there is practically no circulation of air.

Steam, Hot-Water, and Vapor have a "moist sound". But they do not put moisture into the air. Not eight gallons in a whole winter!

And they ought to do that much every day in the average home.

Your own physician will corroborate all that is stated here.

Why Holland Heat is Healthful

First of all the Holland method is to circulate the air in the house much the same as it is circulated in the finest public buildings. The air is removed and replaced several times every hour.

And because of the engineered circulating method there is an even distribution of what the air is made to carry.

The Holland System forces the air to carry moisture as well as heat. This means clean, moist air—circulated—instead of dry, dirty, dead air.

In the mixing of the air it is also heated above the boiling point so the germs are killed.

People living in Holland-heated homes are not subject to drowsiness before the normal drowsy hour. And they are not subject to irritated membranes or itchy skin or that pinched or stifled feeling that is so often noticeable in the building that is heated—heated and dried and nothing else.

Other Advantages

The Holland Heat-Circulating System costs only a little more than the old

"hot-air" furnace which was so often both dirty and inadequate.

The price of the Holland is usually much less than the price of Steam, Hot-Water, or Vapor.

And the Holland uses less fuel than any other system, per room heated. Some systems are beaten only a little in economy by the Holland. Others very materially. The Holland burns the smoke of ordinary fuels, of course. The Holland System is Clean. It necessarily must be to win the unqualified approval of the modern physician.

You are protected by a contract which makes the World's Largest Installers of Furnaces DIRECTLY RESPONSIBLE to you. There is no one else who can enter into the transaction, in any way.

Let us tell you about a Holland for your own individual home. You will not be obligated in the least.

This is an excellent time of the year.

Special prices are now in effect. Terms if you desire.

"Holland Furnaces Make Warm Friends"

LISMAN & CO. OFFER TO TAKE TRACTION LINES

(Continued from first page.)

year franchise which we haven't been able to get heretofore," Ald. Albert said in one of his four speeches. Ald. Mills stressed the same contention. In the course of his speech Mr. Harlan made two outstanding assertions. They are:

"1. A terminable permit means a perpetual franchise; and we, like Chicago bankers, are human, and would certainly be willing to accept it later when the city has the power to grant it."
"2. I was a member of your city council from which was flung the Van Buren street elevated, and if you will have the corporation counsel confer with me and take the action you will later direct, Samuel Insull will be sweetly reasonable as to dealings with the elevated roads. He hasn't the master hand in the situation the city has."

Expect Holders to Accept.

"Suppose the holders of the first mortgage securities of the surface lines refuse to accept the securities you issue, what do you then propose," asked Ald. Arvey of Mr. Lisman.

"We will offer a better bond than they have," Mr. Lisman said. "They will not commit suicide. They never do."

"Are you prepared to duplicate the present surface lines if they refuse to sell them?"

"No, we have not studied such an idea. That will not happen."

"They have no rights after midnight, Jan. 31, next," Attorney Harlan added. "They can take their property and get off the streets."

"Suppose they do, how are you going to furnish transportation?"

"With buses. Acquisition of buses is dependent only upon having the cash to buy them with, and we have the money."

"I have had what I believe is competent legal advice," opined Mr. Busby, "and I am advised that the city is powerless to grant a franchise to a new company unless that licensee steps in with the cash and pays cash for the property—its full capital account of \$163,000,000."

Mr. Lisman and Mr. Harlan describe their plan as service at cost. The proposal lists the purposes for which car fares must be collected—operating, maintenance, renewals, depreciation, interest on bonds, money for sinking fund, and other purposes.

Pay for Operating Service.

Then a fraction of 1 cent car fare shall be collected to pay the city and the company compensation for operating the lines. That fraction of 1

cent will go 55 to the city and 45 to the company. Mr. Lisman twice declined to say what fraction of 1 cent he has in mind. If the fraction is three-fourths of 1 cent, it will amount to \$6,000,000 a year, and if one-eighth of 1 cent it will be about \$1,000,000 a year.

Regarding the identity of his banker associates, Mr. Lisman said that he would show the syndicate agreement "as soon as there was a serious consideration of this proposal." It was assumed by the aldermen that the agreement will disclose the members of the syndicate.

No estimates were presented to indicate how much the car fare will be reduced or increased, nor for what periods, under the plan.

IDENTIFY 3 IN KIDNAPING OF VIRGINIA PRIEST

Norfolk, Va., Sept. 13.—(Special.)—Seven witnesses testifying before a special grand jury investigating the kidnaping of Rev. Father Vincent B. Warren by a hooded mob in Princess Anne county today told how the priest was taken from his automobile while listening to a concert given by a colored boy band from St. Joseph's academy and spirited away in the darkness.

Because the investigation was not

concluded, the evidence in detail was not made public. Five other witnesses are to be examined. The jury adjourned until Sept. 20. As a result of the testimony three members of the mob have been identified and their arrests are expected before the grand jury reconvenes.

As a precaution against interference with witnesses by sympathizers of the hooded fraternity, extra officers were placed on duty around the court house, but they were not needed.

LOSERS \$6,100 IN REALTY BONDS. Mrs. William A. Daly, 5701 Midway avenue, reported to Capt. John Egan of the detective bureau late yesterday that while on her way home she had lost \$6,100 in real estate bonds.

Will sell for cash or terms. For full particulars

ADDRESS B E 243, TRIBUNE

The Grandeur of The Uptown Theater Surpasses Old-World Artistry

The Uptown Theatre has just finished its first anniversary. And what a wonderful year it has been!

In the Uptown Theatre Chicago has one of the largest and most beautiful theatres in the world. The architecture—of the Spanish renaissance period—is unequalled for its ideal and harmonious splendor. Its coloring is gorgeous and the atmosphere is restful.

Nowhere in the whole universe is there a theatre that possesses a lobby and foyers such as are in the Uptown. They are the wonder of every one who sees them. One city block long, over six stories high, massive, magnificent and awe-inspiring, the Uptown Theatre grand lobby with its circular stairway, which winds its way upward to other wonder spots, is a feast for the eyes.

But in planning and constructing the Uptown Theatre we did not stop with the Grand lobby. We carried the same scheme of architectural splendor into the theatre proper, into the auditorium, the mezzanine boxes and the balconies—even to the stage. There are comfortable seats, wide aisles and roominess between the rows of seats. And over all we cast exquisite lighting effects which create a charm and repose seldom seen or felt anywhere.

Behind this grandeur, in the tremendous cellars, sub-cellars and concealed recesses as well as backstage, are innumerable ingenious and intricate devices of modern invention working silently and mysteriously to provide bewitching theatrical effects, as well as to give you every comfort of your own home. We wish we could take you behind the scenes, to every corner of this wonder-theatre, and show you the marvels it possesses.

But it is one thing to build a beautiful frame and another to put the right canvases in the frame.

Even before a shovel was turned for the foundation of the Uptown Theatre, we established a national affiliation with the great theatres—Publix Theatres—of all the principal cities in the United States. This national connection, together with our own producing organization, enables Balaban & Katz Theatres to present stage and screen programs of extraordinary importance. It means that the best of everything produced in stage presentations, modern music and in motion pictures is first offered to the Balaban & Katz Theatres.

We are the logical first market for every producing genius, so that our theatres have the choice of everything worth while.

Were it not for these decided advantages which enable us to serve the public as it should be served, we would not have undertaken the building of the Uptown Theatre. No single theatre in the world, nor even any other chain of theatres now existing, can possibly occupy this enviable position.

Others have tried and will continue to try to imitate our theatres, our form of entertainment, the high and original character of our performances and our service to the public—**BUT BALABAN & KATZ THEATRES WILL CONTINUE TO BE THE DESPAIR OF ALL IMITATORS.**

These six great producing companies (and their stars) create the finest pictures in the world. Balaban & Katz have first choice of all their products.

AFTER THESE COMPANIES THERE IS LITTLE WORTH WHILE LEFT.

THE KLAN MEETS; OPPOSES COURT AND AL SMITH

(Chicago Tribune Press Service.)
Washington, D. C., Sept. 13.—[Special.]—Three thousand delegates to the imperial klavocation of the Ku Klux Klan roared their approval of a program for the order which as its cardinal plank the early withdrawal of the United States from the world court and the defeat of Gov. Al Smith's candidacy for the Democratic presidential nomination.

No secret was made in the meeting of the fact that the Klan is out to control the next and succeeding congresses, and speakers who predicted that under the Klan's influence legislation prohibiting any immigration, requiring the registration of aliens already in the country, and "putting the Holy Bible into every school in the country" will be enacted within four or six years were wildly applauded.

The entry of Hiram W. Evans, imperial wizard, and his klanodum or cabinet, clad in rich purple robes, was the only ceremony during the session, which was almost immediately turned over to the Washington attorney, who, in his address of welcome, launched a bitter attack on the Catholic church, Gov. Al Smith, Mussolini, and the world court.

"Thank God," he asserted, "you have a wizard backed by your thought who will not permit America to bend the knee to any foreigner."

He felicitated the Alabama delegates for the Klan's victory in naming one of its members, Hugo Black, as the Democratic candidate for the United States senate.

Less than 15,000 members of the Klan, in varicolored robes and hood-shaped hats, without masks, participated in the parade down Pennsylvania avenue. The turnout was a dis-

appointment to Klan officials and a surprise to the metropolitan police, who, expecting today's demonstration to exceed that staged last year, were prepared for almost any emergency.

The bulk of the paraders were from Pennsylvania, New Jersey and Virginia, although practically every state in the Union was represented by a small delegation.

FLUENT SPEECH BE A CONVINCING TALKER

DuPont say this—

E. I. DU PONT DE NEMOURS & COMPANY
WILMINGTON, DELAWARE

July 5, 1926

ADVERTISING DEPARTMENT

Herald-Traveler,
Boston, Mass.

Gentlemen:

We are so pleased with the results of our recent campaign on Brush Duco in your paper that we believe it only fair to give your publication the credit due to it.

The du Pont Company has by far the greatest number of outlets among the leading paint and varnish stores in the city proper. In addition, we have secured adequate distribution in the forty towns and villages in the Boston area.

We believe we can rightly attribute this success to three things—

- 1st The unusual qualities of Brush Duco for use in the home.
- 2d The very evident "reader interest" enjoyed by your publication.
- 3d The efficient cooperation given by your merchandising department to our own sales organization.

Very truly yours,
W. A. Hart
W. A. Hart
DIRECTOR OF ADVERTISING

Because they got results

E. I. DU PONT DE NEMOURS & Co., the great paint manufacturers and makers of Duco, the new brushing finish for automobiles, furniture and all household uses, decided to introduce this product in Business Boston.

They carefully considered all Boston newspapers. They used the *Herald-Traveler* exclusively. The results show what can be done in this market by concentration!

The campaign started April 6th. The product was new. Now, three months later, after a consistent every-week campaign, they have distribution in all of the forty cities and towns comprising Business Boston.

In the City of Boston itself (see the part marked "Boston" on the map) DuPont today hold a dominant position in the number of full-line paint and varnish dealers.

It was newspaper advertising that did it, and the *Herald-Traveler* was the only paper used.

DuPont prove value of concentration

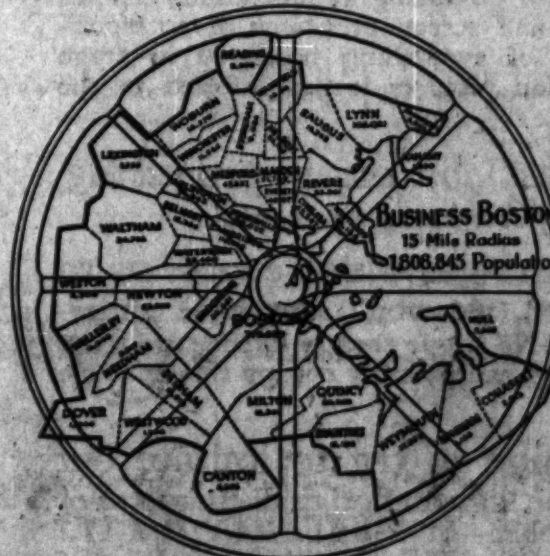

DuPont realized they had to do more than buy just concentration. To get what they wanted—and they were after what every other manufacturer wants, DISTRIBUTION—they concentrated their efforts in the paper that dominates the real purchasing group of Business Boston.

This is only one definite proof, by actual results, where the *Herald-Traveler* has demonstrated that it reaches that part of Business Boston which not only buys, but starts buying—not only follows distribution, but controls distribution.

The leading retailers of Business Boston appreciate the *Herald-Traveler's* following and are governed accordingly.

If Business Boston is in your campaign area, be sure to get the facts about the *Herald-Traveler* market.

See the book, "Business Boston," prepared for advertisers looking for results.

Business Boston is a wheel—not merely a hub.

BOSTON HERALD-TRAVELER

Advertising Representatives

Geo. A. McDevitt Co.

For five years the *Herald-Traveler* has been first among Boston daily newspapers in national advertising, including all financial advertising.

NEW YORK

the most important market in the world

The New York Evening Journal dominates it

THE richest market in the world is concentrated within the limits of Metropolitan New York.

There is more money in the New York trading area than in seven of our large states.

It is a quick turnover market. New Yorkers live well and they buy regularly and often.

New York is a very inexpensive market to sell because—

1. Its outlets of distribution are many and close together.
2. Its transportation facilities are rapid and cheap.
3. Salesmen live at home and traveling expenses are nil.

4. Its population can be reached effectively, dominantly and most economically, because one newspaper reaches 46 out of every 100 people who read New York evening newspapers.

That paper is the *New York Evening Journal*.

Its circulation is 700,000—double that of any other New York evening newspaper—plus 100,000.

Its copies go into the homes—and its circulation is such a large part of the New York market that it can almost be said the *New York Evening Journal* IS the New York market.

Its people have the money to buy

anything from Steinway pianos and Packard cars to the best known cigarettes and breakfast foods.

For twenty-seven consecutive years it has had the largest evening circulation in America. For twelve consecutive years more money has been spent in advertising in the *Evening Journal* than in any other New York evening newspaper.

Every evening it is carried into the home and is read by 700,000 families, or figuring three readers to a family, 2,100,000 people—the most responsive audience of evening newspaper readers in the United States.

Let us tell you how you can sell

25% of your production in New York City and at the lowest sales and advertising cost.

What the New York Evening Journal did for Wheatworth Self Rising Whole Wheat Flour

The letter from the F. H. Bennett Biscuit Company, reproduced herewith, tells a story which is typical of the experience of *New York Evening Journal* advertisers. The results obtained, after only four weeks of advertising, were "far beyond our expectations and beyond anything we ever experienced

in any of our previous campaigns."

Nothing could better illustrate the power of the *Evening Journal* than its success in launching a new product in a short space of time. The co-operation of the *Evening Journal*

Merchandising Department, and the tremendously effective color pages in the *Evening Journal* itself, established Wheatworth Self Rising Whole Wheat Flour in the New York market within thirty days!

F. H. BENNETT BISCUIT COMPANY

MANUFACTURERS OF
BISCUIT SPECIALTIES

139-141 Avenue D
NEW YORK

New York Evening Journal,
Columbus Circle, New York City.

November 23rd, 1925.

Gentlemen: It is still a little bit early to state accurately the results of our advertising campaign on Wheatworth Self Rising Whole Wheat Flour in the *Evening Journal*, but we can say today, after only four weeks of advertising, that the results are far beyond our expectations and beyond anything that we have ever experienced in any previous advertising campaign.

We began this campaign with a full page in color in the Saturday Home Journal on October 24th. The work of securing dealer distribution began only one week previous. A check-up made during the week of November 9th showed that we already had better than 50 per cent distribution of all stores, including chains.

Before the second full page in color appeared in the Saturday Home Journal on November 14th we had sold and secured active co-operation from ten of the leading chain store grocers. Some of these chain stores called us on the telephone on the Monday following the appearance of the full color page, and asked us about the new product before we had time to call on them.

Frankly, the quick response from the trade and the general and almost instantaneous reaction from consumers produced by this campaign are unique in our experience. The work of your merchandising staff in supplementing the efforts of our own sales force has been extremely effective and valuable, and we wish to express our sincere appreciation of your wholehearted support and co-operation.

Cordially yours,

Frank A. Heston

Sales and Advertising Manager.

MRS. MCPHERSON DENIES PLOT AT CARMEL COTTAGE

Affidavit Lists Charges Against Evangelist.

BY GEORGE SHAFER.

(Chicago Tribune Press Service.)
Los Angeles, Cal., Sept. 13.—Almae McPherson today received the news that she had been accused of promising \$5,000 to her "double," Mrs. Lorraine Wiseman, in return for which Mrs. Wiseman was to admit that it was she who spent ten days of late May in the Carmel, Cal., seaside bungalow with Kenneth Ormiston, Mrs. McPherson's former radio operator.

MRS. ALMAE MCPHERSON.
(P. and A.)
denial, and then barred herself to all but her lawyers.

from a cell in city jail, was listing dates, sums, incidents, addresses, and conversations in support of her story. Many of the passages in Mrs. Wiseman's two affidavits mentioned Mrs. McPherson and her mother, Mrs. Minnie Kennedy. They also mentioned conversations between Mrs. Wiseman and the attorneys of Mrs. McPherson.

"Paid to Pose as Evangelist."

In her affidavit, Mrs. Wiseman stated that she had been told by Mrs. McPherson to dress like the woman evangelist, and had even gone to the length of ordering false hair.

Mrs. Wiseman's story to officials was that she was promised \$5,000 from Mrs. McPherson, but received only \$2,000. In return she was to go before reporters, officials, and the Los Angeles county grand jury and swear that she and "Miss X." had been in the Ormiston cottage.

Mrs. Wiseman stated that she obtained a woman willing to swear that she had been "Miss X." Ormiston's companion, in the person of Miss Rachael Wells, whom she induced to come from Philadelphia to San Francisco in furtherance of the plan. She said Miss Wells appeared in person in Salinas, Cal., and made affidavit that she had been "Miss X."

Will Go Before Grand Jury.

Mrs. Wiseman was released on \$1,500 bail on bad check charges late this afternoon. She promised county officials she would go before the grand jury and tell of her part in the McPherson case when the new grand jury meets some time after Sept. 20. Mrs. Wiseman confessed to the plot when confronted by her twin sister, Mrs. Virgil McDonald Kimball of Oakland, Cal., who reproached her for intimating that her twin sister had been at Carmel with Ormiston.

A "man named Martin," who is said to have appeared in San Francisco to

act with Mrs. Wiseman in Mrs. McPherson's interests, and who, Mrs. Wiseman today declared, seemed aware of the stopping places of Kenneth Ormiston, also came to light as a mysterious figure in the case today. It is recalled that a Chicago lawyer, Edward H. S. Martin, forwarded an affidavit, signed by Ormiston, from Chicago to Los Angeles last Aug. 1, which was addressed to District Attorney Asa Keyes and was the first mention of "Miss X." ever made in the case.

Mrs. Wiseman's affidavit mentions dates that she slept in Mrs. McPherson's bed and other dates on which

she avers she went swimming with Mrs. McPherson.

"Mrs. McPherson coached me on points which were vital to the story," the affidavit says. "Her attorney, Mr. Woolley, took me to a handwriting expert to give specimens of my writing. He said that handwriting found at Carmel was the most damaging thing against Mrs. McPherson. He told me not to permit a soul to see my handwriting. Then, when copies of grocery lists found at Carmel were printed, I was instructed to try to copy the words and the signature. Those were the words and signatures found by reporters in my black book."

Marine Flyer Killed in Crash of Racing Plane

(Picture on back page.)
Washington, D. C., Sept. 13.—(Special.)—First Lieut. Harmon J. Norton, one of the aces of the marine flying corps, crashed to his death in the Potomac river off Haines Point this afternoon while flying a racing plane. He was practicing for the Schneider cup races.

"Does wonders for chafed itching skin"

"My doctor told me about it and if I couldn't get another jar I wouldn't give this one up for anything."

That is how many people regard Resinol Ointment. It is specially recommended for eczema and other itching skin troubles, but it is also excellent as a general household remedy for burns, scalds, chafings, cold sores, pimples, boils, insect bites, etc.

Free
Your druggist sells Resinol Soap and Ointment, but if you wish to try before you buy, send to Dept. 57, Resinol, Baltimore, Md., for a free sample of each.

Announcing the National Broadcasting Company, Inc.

National radio broadcasting with better programs permanently assured by this important action of the Radio Corporation of America in the interest of the listening public

THE RADIO CORPORATION OF AMERICA
It is the largest distributor of radio receiving sets in the world. It handles the entire output in this field of the Westinghouse and General Electric factories.

It does not say this boastfully. It does not say it with apology. It says it for the purpose of making clear the fact that it is more largely interested, more selfishly interested, if you please, in the best possible broadcasting in the United States than anyone else.

Radio for 26,000,000 Homes

The market for receiving sets in the future will be determined largely by the quantity and quality of the programs broadcast.

We say quantity because they must be diversified enough so that some of them will appeal to all possible listeners.

We say quality because each program must be the best of its kind. If that ideal were to be reached, no home in the United States could afford to be without a radio receiving set.

Today the best available statistics indicate that 5,000,000 homes are equipped, and 21,000,000 homes remain to be supplied.

Radio receiving sets of the best reproductive quality should be made available for all, and we hope to make them cheap enough so that all may buy.

The day has gone by when the radio receiving set is a plaything. It must now be an instrument of service.

WEAF Purchased for \$1,000,000

The Radio Corporation of America, therefore, is interested, just as the public is, in having the most adequate programs broadcast. It is interested, as the public is, in having them comprehensive and free from discrimination.

Any use of radio transmission which causes the public to feel that the quality of the programs is not the highest, that the use of radio is not the broadest and best use in the public interest, that it is used for political advantage or selfish power, will be detrimental to the public interest in radio, and therefore to the Radio Corporation of America.

To insure, therefore, the development of this great service, the Radio Corporation of

America has purchased for one million dollars station WEAF from the American Telephone and Telegraph Company, that company having decided to retire from the broadcasting business.

The Radio Corporation of America will assume active control of that station on November 15.

National Broadcasting Company Organized

The Radio Corporation of America has decided to incorporate that station, which has achieved such a deservedly high reputation for the quality and character of its programs, under the name of the National Broadcasting Company, Inc.

The Purpose of the New Company

The purpose of that company will be to provide the best program available for broadcasting in the United States.

The National Broadcasting Company will not only broadcast these programs through station WEAF, but it will make them available to other broadcasting stations throughout the country so far as it may be practicable to do so, and they may desire to take them.

It is hoped that arrangements may be made so that every event of national importance may be broadcast widely throughout the United States.

No Monopoly of the Air

The Radio Corporation of America is not in any sense seeking a monopoly of the air. That would be a liability rather than an asset. It is seeking, however, to provide machinery which will insure a national distribution of national programs, and a wider distribution of programs of the highest quality.

If others will engage in this business the Radio Corporation of America will welcome their action, whether it be cooperative or competitive.

If other radio manufacturing companies, competitors of the Radio Corporation of America, wish to use the facilities of the National Broadcasting Company for the purpose of making known to the public their receiving sets, they may do so on the same terms as accorded to other clients.

The necessity of providing adequate broad-

casting is apparent. The problem of finding the best means of doing it is yet experimental. The Radio Corporation of America is making this experiment in the interest of the art and the furtherance of the industry.

A Public Advisory Council

In order that the National Broadcasting Company may be advised as to the best type of program, that discrimination may be avoided, that the public may be assured that the broadcasting is being done in the fairest and best way, always allowing for human frailties and human performance, it has created an Advisory Council, composed of twelve members, to be chosen as representative of various shades of public opinion, which will from time to time give it the benefit of their judgment and suggestion. The members of this Council will be announced as soon as their acceptance shall have been obtained.

M. H. Aylesworth to be President

The President of the new National Broadcasting Company will be M. H. Aylesworth, for many years Managing Director of the National Electric Light Association. He will perform the executive and administrative duties of the corporation.

Mr. Aylesworth, while not hitherto identified with the radio industry or broadcasting, has had public experience as Chairman of the Colorado Public Utilities Commission, and, through his work with the association which represents the electrical industry, has a broad understanding of the technical problems which measure the pace of broadcasting.

One of his major responsibilities will be to see that the operations of the National Broadcasting Company reflect enlightened public opinion, which expresses itself so promptly the morning after any error of taste or judgment or departure from fair play.

We have no hesitation in recommending the National Broadcasting Company to the people of the United States.

It will need the help of all listeners. It will make mistakes. If the public will make known its views to the officials of the company from time to time, we are confident that the new broadcasting company will be an instrument of great public service.

When Present Rates Were Made LIBERTY'S Net Paid Circulation Was 1,100,000.
Now We Offer You An Average Net Paid Circulation of 1,350,000 During 1927 at the Same Rates.

TWO YEARS OLD and ALREADY SECOND in Advertising Lineage

MORE advertising was printed by LIBERTY during the first six months of 1926 than by any other magazine of general character, with the exception of The Saturday Evening Post.

Never before, in the history of publishing, has such a growth been recorded. It was made possible by the employment of the unusual advertising advantages found in LIBERTY.

ONLY the unprecedented endorsement of many leading agencies and outstanding advertisers in all classifications of American industry is responsible for LIBERTY'S rapid growth.

LIBERTY is ready to prove to others how it can make their advertising more effective. It is advisable to get details before the advertising rates are increased on November 1st.

Hog receipts yesterday at 34,000, among the smallest of the year for Monday, cleared at strong to 25c higher prices, top 170 to 205 lb. averages advancing 25c to \$14.55, with general average at \$12.05, the highest since July 26. Light weights from the new crop were plentiful and suffered a reaction after shipping orders were filled, buyers averaging 140 to 160 lb. averages are dressing at a much lower percentage than old crop hogs. Average weight yesterday was lightest in some time for Monday. Mixed hogs bringing \$10.50 to \$11.50 compared with \$11.50 to \$12.50 for the same grade of hogs. Offerings, however, with weight packers in liberal supply around \$10.00. Most butchers cleared at \$12.50 to \$13.50, prime 300 pounders selected for ship and at \$12.75 and 350 lb. averages up to \$13.25. Bulk of better grades of 225 lb. butchers brought \$11.75 to \$12.25. Better grades of cattle sustained last week's strength on the largest receipts of the year, arriving at 35,000 being second largest for any day since November, 1924. More than 100 yearlings, including heifers, averaging from 900 to 1,010 lb. reached \$11.50, the season's top, with prices 1,400 lb. steers at \$11.75. Bulk of beef steers brought \$9.75 to \$11.25, against \$9.75 to \$11.25, initial market day last week. Last week's pronounced gains brought quotations to an attractive level resulting in a flood of cattle from the west comprising over three-fourths of the day's arrivals. Range cattle numbering 12,500, second largest in two years, met fair demand at steady to 25c lower prices. Baby beef heifers held steady, while most butcher stock ruled weak to 25c lower. Bulls sold steady. Stockers and feeders were little changed. Calves slumped 50c. Considering the immensity of yesterday's receipts of live stock, all kinds at about 100,000 being the largest since last April, prices held up well in practically all branches. Increases were in cattle and sheep.

Sheep Receipts Large.

Sheep receipts totaled to exceed 20,000, the second largest since last February. Aged sheep held steady, being in moderate supply, while lambs ruled weak to 25c lower. Best fat range lambs stopped at \$15.00 to shippers and at \$14.75 to packers, with natives to shipper and city butchers at \$14.00 to \$14.50 and to packers at \$14.25 downward. Weighty buck lambs were around \$12.00 and culls at \$10.00 to \$11.00. Demand for feeders narrowed over the week-end and country buyers were more cautious, insisting on cuts of 150 to 200 lbs. from last week's quotations. Fancy 57 lb feeders topped at \$15.00 and bulk of fat to good kinds at \$13.75 to \$14.75, numerous sales below \$14.00. Choice handy weight range ewes brought \$7.25 and aged wethers at \$6.00.

FINANCIAL NOTES

Unfilled orders of the Oils Elevator company are reported to be the largest the company ever has had since its business for the first eight months this year also was the best on record. The company earned \$152,341 a share on the common in 1925, a record year with net income of \$4,730,000.

Gross sales of the Ward Baking corporation for the thirty-two weeks ended Aug. 1, totaled \$38,731,723, compared with \$35,546,432 for the corresponding period last year. Net profit for the period after interest, depreciation and federal taxes, were \$2,513,203, compared with \$2,455,368 for the first thirty-two weeks of the previous year. The company has outstanding \$21,841,500 of 7 per cent cumulative preferred, \$8,093 shares of no par common class "A" stock and 500,000 shares of no par common class "B" stock.

The Consumers Power company of Michigan has been authorized by the state public utilities commission to issue and sell \$2,000,000 of 6 per cent preferred capital stock for improvements and for adding to its facilities.

The National City company will offer today new issue of \$15,000,000 6 1/2 per cent external loan sinking fund gold bonds of the Republic of Finland at 94 and interest, to yield 6.08 per cent. The bonds mature Sept. 1, 1936, and are noncallable for ten years except for sinking fund.

The American Banking and Building company reduced the price of lead from 8.50c to 8.75c per pound.

(As Officially Presented on Monday, September 13, 1926)

The "Lisman Plan" which will Solve Chicago's Transportation Problem

It will Unify Chicago's Surface, Motorbus, Elevated Lines and Build Subways as a part of the Whole System, with No Delay—

Mr. Mayor, Mr. Chairman and members of the Committee on Local Transportation of the City Council of Chicago:

Mr. John Maynard Harlan, our counsel, indicated to you some weeks ago that New York bankers were prepared to make a proposal to your City for the unification of its transportation system within the limitations of the present law.

In response to your invitation I am now here to present this proposal personally and to say that my firm, representing a syndicate of New York, Chicago and other bankers, is prepared to finance the proposition about to be presented to you.

Proposal for solving Chicago's Transportation Problem, immediately and permanently, without new State legislation

FOREWORD

The existing franchises of the surface lines will expire January 31st, 1927. Upwards of \$160,000,000 outstanding bonds of the existing companies will then become due, with no funds available for their payment and no means of refunding them. The companies have declared that they cannot devise any ordinance, under existing law, that would serve as a sufficient basis for raising new money for improvements, new equipment and needed extensions.

We, however, are confident that a solution can be worked out under existing law. We can and will provide new money on the basis of a twenty-year franchise. A so-called "terminable" permit or "indeterminate" or perpetual franchise is not at all necessary.

While the situation of the surface lines is the proximate reason for immediate action, we recognize, as you do, that this is only a part of Chicago's transportation problem. The time is at hand for Chicago to deal broadly with the whole problem of city transportation and to effect a comprehensive and permanent solution—a solution which will enable Chicago, hereafter, by its own action and without asking leave of anyone, to make sure, at all times, that her transportation facilities shall expand progressively to meet her ever-growing transportation needs.

To be permanent and complete, the solution of Chicago's transportation problem must bring about:

- Unification in the ownership, as well as in the operation, of the surface lines; progressive improvement and extension of their service to meet the public needs and, to that end, the establishment of a practical method of maintaining the credit of the unified owner company so that capital, as needed from time to time, may be obtained on reasonable terms. This can be accomplished immediately, without new legislation, if the City will use the powers it already has under State Laws.
- The establishment and operation of motorbus lines, not only as feeders to the surface, subway and elevated lines, but also for convenient transportation along routes removed from those lines. This can be begun immediately and expanded rapidly to meet public requirements.
- The construction of city-owned subways, beginning with the central subway which is the key to unified and co-ordinated operation of existing transportation lines, surface and elevated, and the operation of those subways by the unified owner company. Subway construction can be begun NOW—before the New Year—and, with competent engineering supervision, completed, if the City will say the word, by giving us a contract on the basis of a reasonable construction profit, we giving proper bond for performance. The central subway, at least, can be finished and put into use long before the City's Centennial in 1932.
- The union of the elevated lines with the surface lines, subways and motorbus lines, as parts of one co-ordinated system of city transportation. How soon this can be accomplished depends upon how soon the owners of the elevated lines will consent to such a union on terms which the City would sanction as being fair to it and the public. Under our financial plan the new company could not benefit by driving a hard bargain with the owners of the elevated lines.
- Removal of the Elevated Loop—that steel belt around the heart of the City which impedes its circulation and prevents expansion of its business center. This must necessarily await the building of the central subways to let the elevated pass under, through and around the Loop district; but in a grant to our new company, conditions can be created which, with City co-operation, will assure the early removal of the elevated loop without expense to the City.

Under our plan, the City of Chicago, if it wishes, may, without expense to itself, become the owner in perpetuity of all the City's transportation lines, free from lien or encumbrance of any kind; whereupon, unless the city should wish, itself, to operate the lines, it could lease them for private operation on a rental basis.

THE PLAN

I—SURFACE LINES AND NEW MOTORBUS LINES

A new company to be organized and empowered to acquire, construct, establish, lease, maintain and operate street railways, motorbus lines and passenger subways; the City to pass in favor of such new company an ordinance which shall contain, among others, suitable provisions to the following effect:

1. The new ordinance to grant a permit, good for twenty years, not only to acquire and operate street railways and to establish motorbus lines in all streets now being used for street railway purposes, but also to establish and operate motorbus lines in all other streets, in which it may be deemed advisable that motorbus lines be operated in connection with the new company's lines in streets now being used for street railway purposes; such permit to become effective February 1, 1927, or as soon thereafter as such new ordinance shall be duly accepted by the new company, the time allowed for such acceptance to be fixed in the new ordinance.

2. The new ordinance to authorize and require the new company (a) to execute an open first mortgage covering all its property, tangible and intangible, and its net earnings, to secure not only all its bonds hereinafter referred to as "First Mortgage 20-year Gold Bonds" but also its bonds hereinafter referred to as "First Mortgage 50-year 5% Gold Bonds," and (b) also, but in all

respects subject and subordinate to said first mortgage, to execute a general mortgage on all the new company's said assets to secure its bonds hereinafter referred to as General Mortgage 5% Gold Bonds.

3. The new ordinance to obligate the new company to supply, for extensions, improvements and new equipment of and for the surface lines and motorbus lines, new money up to the amount of cash realized from the sale of First Mortgage 20-year Gold Bonds (first series) of the par value of \$50,000,000, all to be dated as of the day of the beginning of said 20-year franchise, to mature 20 years thereafter, to bear interest at not less than 5% per annum, to be secured by said first mortgage on all the new company's property and net earnings and to have a cumulative sinking fund adequate to retire said bonds at maturity.

NOTE: Under present money market conditions we will purchase the first series of First Mortgage 20-year bonds up to \$50,000,000 at not less than 95% of the rate of interest in 1926, or at not less than 94% if the rate of interest shall be 1926, or as soon as the new company shall receive its ordinance.

4. The new ordinance shall provide also (a) that, if at any time during its life, it shall be found that new money in excess of the avails of said first series of First Mortgage 20-year Gold Bonds, is or will be required for other capital improvements such as new equipment, etc., and if the City shall then duly extend the life of such new ordinance for the further period of 20 years from the date of the passage of such extension ordinance, then the

new company, upon acceptance thereof, shall thereupon become and be obligated to provide and expend for such additional extensions and capital improvements all the cash that can then be realized from a second series of First Mortgage 20-year Gold Bonds totaling in their par value a sum equal to the amount then in the sinking fund provided for the retirement at maturity of said first series of First Mortgage 20-year Gold Bonds, and to bear interest at a rate not less than 5% per annum; such second series of First Mortgage 20-year Gold Bonds to be dated the day of the passage of such extension ordinance, to be payable in 20 years thereafter and to have a cumulative sinking fund, adequate to retire the same at maturity; and (b) that in case of subsequent further extensions of the new ordinance for 20-year periods, the new company shall be similarly obligated to provide new money as needed, the only limitations being that each new series of First Mortgage 20-year Gold Bonds shall bear interest at the rate of not less than 5% per annum, shall be dated the day of the passage of the then latest extension ordinance and shall mature 20 years thereafter, that no new series of such 20-year bonds shall exceed at par the amount then in the sinking fund provided for the then next preceding series and each series shall have its cumulative sinking fund adequate to retire that series at maturity.

5. The new company to be obligated and authorized by the new ordinance to issue its First Mortgage 50-year 5% Gold Bonds (to be likewise secured by said first mortgage) to an amount not exceeding the total outstanding First Mortgage Gold 5s of the Chicago Railway Company, the Chicago City Railway Company and the Calumet & South Chicago Railway Company, respectively, and to give the same in exchange at par to those holders of outstanding First Mortgage Gold 5s who by timely deposit of their said bonds, under the deposit agreement to be attached as an exhibit to and made a part of said new ordinance, shall have elected to make such exchange; said First Mortgage 50-year 5% Gold Bonds to be so exchanged within such time as may be specified in the new ordinance after the new company shall have acquired possession of the street railway properties of said existing companies and the right to operate the same and to have priority over all obligations of the new company except said First Mortgage 20-year Gold Bonds; the new company to retain a specified per cent out of said First Mortgage 50-year 5% Gold Bonds to cover the expenses and charges incident to such refunding operation. There shall be a cumulative sinking fund for said First Mortgage 50-year 5% Gold Bonds adequate to retire the entire issue thereof in fifty years.

6. The new company to be likewise obligated and authorized by the new ordinance (a) to issue its General Mortgage 5% Gold Bonds (to be secured by said General Mortgage) to an amount not exceeding the difference between the total of the city purchase prices (under the existing ordinances) of the street railway properties of said last mentioned three companies and the Southern Street Railway Company, and the total of the outstanding First Mortgage Gold 5s of those of said companies that have any such bonds outstanding; and (b) to give said General Mortgage 5% Gold Bonds in exchange to those holders of direct or indirect junior interests (in liens upon, or enforceable claims against, the property of said companies or either of them who, by timely deposit under said deposit agreement, of their junior bonds, stock certificates or other evidences or tokens of such junior interests, duly assigned in blank, shall have elected to accept, in exchange therefor, said General Mortgage 5% Gold Bonds on such basis of exchange as shall be prescribed and fixed, after due hearing pursuant to the provisions of the plan of reorganization and readjustment mentioned in the said deposit agreement; said General Mortgage 5% Gold Bonds to be so exchanged within a reasonable specified time after such fixing of the basis of such exchange and after the new company shall have acquired possession of the street

railway properties of said existing companies and the right to operate the same; the new company to retain a specified per cent of the General Mortgage 5% Gold Bonds to cover expenses and charges incident to such refunding operation. There shall be a cumulative sinking fund for said General Mortgage 5% Gold Bonds, adequate to retire the entire issue thereof in fifty years.

7. If and whenever the new company's right to operate said street railway lines shall cease, either at the end of 20 years from February 1, 1927, or at the end of any extension period, the maturity of said First Mortgage 50-year 5% Gold Bonds and of said General Mortgage 5% Gold Bonds shall be accelerated and all of both said issues shall automatically become and be forthwith due and payable.

8. Said deposit agreement shall provide among other things (a) for a plan of reorganization and readjustment, whereunder the trustee, named in such deposit agreement, or the new Company, with the approval of such trustee, may enter into any contract or contracts, or take any suitable action or actions for the enforcement or the disposition of all or any part of the beneficial interest appertaining to any or all said depositors' securities, which shall be necessary in order fully to carry into effect such plan of reorganization and readjustment, provided only that the trustee shall receive the securities or other benefits allotted, under such plan, in respect of such depositors' securities, for delivery to the holders of certificates of deposit, representing such depositors' securities, upon performance of the conditions, if any, attached to such delivery by the terms of said plan of reorganization and readjustment;

(b) that to the end that the new Company's title to the street railway properties of said existing companies may be complete and perfect and free from all claims or liens other than those by said new ordinance and deposit agreement authorized to be created by the new Company, said trustee, acting on behalf of the new Company, may cause to be foreclosed any and/or all trust deeds or mortgages upon any of said street railway properties, whenever there shall have been deposited with the trustee bonds sufficient under the said trust deeds or mortgages respectively, to entitle the holders thereof to institute or require to be instituted foreclosure proceedings; and

(c) that if, when and so soon as a majority of the shares of stock of any or all of said existing companies shall have been deposited under such deposit agreement, the trustee or the new Company, with the approval of the trustee, may vote said majority shares of stock as said trustee and the new Company shall be advised shall be lawful and effective to place the new Company in lawful possession of the street railway properties of the existing companies with the right to use and operate the same.

9. Whenever the new Company shall have acquired lawful possession of or the right to use and operate the street railway properties of the existing companies, then promptly following such acquisition, the new Company shall begin to operate and thereafter, so long as the new ordinance shall be in force, shall continue to operate said street railway properties and, if it shall so elect, discontinue the operation of motorbuses in those streets in which street railways are being operated by the new Company.

10. Nothing in the new ordinance shall be construed to confer directly or indirectly any interest in, or right with respect to, the authority and permission granted to the new Company by the new ordinance or otherwise, upon any holder of any bond, share of stock, participation certificate or other token of interest in the properties, franchises, rights and claims of the existing companies or either of them.

11. Improvements and extensions of surface lines shall be made and constructed by the new company at actual cost plus 10% construction profit.

12. If the new Company shall be allowed by such new ordinance and successive extensions thereof to operate said street railway and motorbus lines for the full period

of fifty years from February 1, 1927, then the new Company, at the end of said fifty years, will forthwith transfer, set over, quitclaim and convey to the City of Chicago, for a consideration of one dollar, all said street railway lines, extensions thereof, equipment appertaining thereto and all its motorbuses and equipment, together with all the properties belonging to said new Company and used in connection with the operation of said street railway and motorbus lines.

13. The City, however, if thereunto enabled by popular vote in accordance with law, shall have the right to purchase and take over all the properties of the new Company for city operation at any time during the life of said new ordinance or any extension thereof, of the terms of purchase by the City in such event to be now agreed upon and clearly set forth in the new ordinance.

14. The lines are not to be run for profit; but service is to be given at cost, as nearly as may be. The rate of fare shall be enough, but only enough to pay the cost of efficiently and adequately maintaining and operating all the new Company's lines; to meet the requirements of the sinking fund, renewals and depreciation fund and other funds, and deductions from gross earnings, specified and directed by the new ordinance to be made and to pay the annual interest on all outstanding bonds of the new Company. Accordingly, the fare shall be lowered or increased as may from time to time become possible or necessary and in the meantime the fare shall remain, as at present, seven cents.

15. There shall be free interchange of transfers at points of intersection of the different lines operated by the new Company, whether surface, subway or motorbus lines. The lines of the new Company shall exchange transfers with the elevated lines at intersecting points if, as and when required by the City and consented to by the elevated lines.

16. Provisions for maintenance and repairs and for renewals and depreciation similar to those in the ordinances of 1907, except that, in the light of experience, the renewals and depreciation fund should be not more than 6%, instead of 8% of the gross earnings, and, with proper public authorization from time to time, moneys in that fund not needed for renewals and depreciation, should be made available for extensions and new equipment. Thus the sinking funds above provided for will not entail any additional burden upon the car-riders. The percentage of gross earnings to be contributed to the renewals and depreciation fund may be increased either by agreement between the new Company and the City, or in case of inability to agree, by expert arbitration.

17. Net earnings shall be ascertained and determined as follows: From the gross earnings of the street railway, subway and motorbus lines, operated by the new Company, there shall be deducted (a) all expenses of operation, including maintenance and repairs and renewals and depreciation; (b) all amounts contributed during the fiscal year and then held in reserve under provisions of the ordinance for the establishment of sinking funds, renewals and depreciation fund and other funds; (c) all amounts paid out for taxes and assessments, levied and imposed upon the real and personal property of the new Company, including all capital stock and franchise taxes levied or assessed after January 31, 1927, but not including any taxes which may, by any court, be ordered to be levied, assessed or collected after the 31st day of January, 1927, on account of the failure of any company, person, firm or corporation, owning or having any interest in said street railway properties, to pay any taxes which should have been paid for or on account of said street railway properties prior to the 31st day of January, 1927; (d) all salaries and expenses, if any, by the new ordinance expressly or impliedly authorized; (e) a sum equal to the accrued and unpaid interest, if any, on all the authorized outstanding bonds of the new company; and (f) an amount equal to a fraction of one cent per paying passenger to be divided between the City and the new Company in the ratio of

55% to the City (to be allowed to accumulate for use in building subway extensions and, pending such use, to be invested, at the discretion of the City Comptroller, in the purchase of any of the bonds of the new Company at the market) and 45% to the Company, which the new Company shall be authorized to retain and to appropriate to its own use by way of compensation for its services and in lieu of any interest in the net earnings to be derived from said lines operated by the new Company; and (g) an amount sufficient to make good the shortage, if any, with respect to any of the foregoing items in any previous year or years.

18. To stabilize the fare, to insure the making of the payments required by the new ordinance to be made out of gross receipts and to supply working capital, a fund of \$5,000,000 shall be provided and maintained liquid by the issue of such First Mortgage Gold Bonds. All income derived by the stabilization fund shall belong to that fund.

If, in any year, the net earnings from operation of the new Company shall be sufficient to pay all said amounts so authorized to be deducted or paid therefrom, then the deficiency, temporarily supplied out of the stabilization fund, shall be made up out of the excess earnings from operation of the next following year or years and paid back into the stabilization fund until that fund shall have been fully reimbursed the amount of such deficiency at any time previously supplied from that fund.

19. All surplus of net earnings as above ascertained and determined, remaining at the end of each year, and all moneys in excess of \$5,000,000 at the end of any year in said stabilization fund, are to be forthwith paid as additional contributions into the sinking fund or funds appertaining to the next maturing bond issue or issues if such contributions shall be more than sufficient to complete the payment of the then earliest maturing issue. If, whenever and as often as there shall be in any sinking fund an amount exceeding the sum then proportionately necessary for the retirement at maturity of all the bonds of the particular issue to which such sinking fund appertains, then the new Company may, with such excess amount then in such sinking fund, buy at the market price, but not above par, for the account of such sinking fund, any bonds of that particular issue, and the bonds so purchased may, at the discretion of the Company, be cancelled forthwith; or if that issue shall have been retired, then such excess may be applied in like manner with respect to bonds of the then next maturing issue.

20. Unless and until the State of Illinois shall, by valid legislation, grant or shall authorize and empower the City of Chicago to grant an indeterminate franchise or permit, terminable only for material breach of covenant, on the part of the grantee, or by City purchase, and unless and until under such new legislation there shall have vested in the Company such an indeterminate franchise or permit to replace the franchise or permit by the new ordinance granted, the amount of such First Mortgage 20-year Gold Bonds at any time outstanding shall not exceed \$50,000,000 par value in excess of the total aggregate amount then in all the sinking funds for First Mortgage 20-year Gold Bonds. If and when such enabling legislation shall have been passed and, thereunder, there shall have vested in the new Company such an indeterminate franchise or permit, then, such First Mortgage Gold Bonds thereafter to be issued shall be 50-year bonds and the cumulative sinking funds thereof shall be adequate to retire the same in 50 years.

NOTE: Simultaneously with the negotiations for such new ordinance we will also negotiate with the City a form of ordinance for the purchase of the City's existing street railway and motorbus lines, if granted a permit good for 20 years under existing laws, will stabilize the fare and by the new ordinance, to secure such 20-year permit and to accept in full the amount of such bonds, and when the same shall be granted by the City under new enabling legislation.

21. If on February 1, 1927, the existing companies shall not have vacated the streets now occupied by their tracks and yielded possession thereof, to the new Company, upon the terms laid down in the new ordinance or mutually agreed upon between them and the new Company, then the City shall promptly give to the existing companies notice to remove within six months all their tracks and other property from the city streets and restore the parts thereof so occupied by their tracks and other property to the same condition as the contiguous portions of such streets.

II—SUBWAYS

We are ready to sign, as soon as it can be prepared, a contract to build for the City its subways upon a basis affording us a reasonable construction profit and under the most rigid expert supervision that can be devised and applied. That it may be clearly understood that we mean exactly what we say in this connection, we beg leave to inform you that we have already retained as our engineers to be placed in charge of the subway construction work, the firm of Parsons, Klapp, Brinkerhoff & Douglas who, universally known for their ability, skill and reliability, are perhaps specially well known to the City of Chicago, where members of that firm, in association with Mr. Bion J. Arnold, have made important comprehensive investigations and valuable reports on the construction of subways in Chicago. If the City is prepared now to furnish drawings and specifications for the subways it desires to have built, we are ready immediately to discuss and settle the details of a construction contract, and to execute the same and commence work without any delay. So far as we are concerned, there is no reason why the work could not be begun and well under way before the new year.

But the new Company will obligate itself to operate its lines through the subways if and as desired by the City regardless of when or by whom the subways shall be constructed.

III—THE ELEVATED LINES

We are ready to take over the elevated lines if their owners are willing to sell or lease them upon a fair and reasonable basis. If so, the new Company will either purchase or lease those lines; and in either event we are ready to modify and enlarge our financial program to fit the requirements of such a step. If, on account of excessive demands, purchase or leasing is not now feasible, then the new Company will pledge itself in the most effective manner which can be devised by apt provisions in the new ordinance to make such purchase or lease on an equitable basis, and, pending such purchase or lease, to enter into a fair operating agreement with the elevated lines that will as nearly as possible give the public the improved transportation facilities and benefits which the public would have if the surface lines and elevated lines were owned and operated by one company as a unified system.

Purchase or leasing of the elevated lines or such an operating agreement with them will never be delayed by any unreasonable demand on our part or on the part of the new Company to be formed by us; but we cannot control, determine or even influence the attitude in either respect of the elevated lines.

We will add, however, that if the new Company to be formed by us shall ever acquire, through purchase or otherwise, control of the elevated lines, it will obligate itself so soon as the central subway shall be constructed and the elevated lines afforded the opportunity to pass through or around the portions of the City now covered by the elevated loop, the new Company will remove the elevated loop if the City shall so desire, and that, too, without any claim for reimbursement or damage beyond the actual expense of such removal and the restoration of street pavements, etc., all of which probably would be covered by the scrap value of the structure.

YESTERDAY'S AVERAGES

25 railroads..... 117.75
25 industrials..... 117.75
25 stocks..... 117.75

The stock market on General Motors

was a battle of speculators

struggled for control, net gains

and losses being about evenly divided.

The approach of the third quarterly income

tax payment date and recurrent

rumors about stiffer money rates tend-

ed to restrict public participation, but

failed to curtail the activity of pools

in a few stocks in which special devel-

opments are reported to be pending.

Call money held steady at 5 percent

all day.

Steel shares failed to respond to pre-

dictions of a continuance of good busi-

ness through the final quarter of the

year, and to Chicago reports that the fall

trading movement of steel rails had be-

gun, judging from current inquiries of

the principal railroads. U. S. Steel

common fluctuated within a range of 1

point, closing fractionally higher at 147.

Liquidation in Motors

Heavy liquidation again took place in

the motor group, being accompanied by

rumors of further price cuts and de-

creased production and sales. Mack

Trucks, which recently put into effect a

more stringent credit policy likely tem-

porarily to restrict sales, broke more

than 4 points to 113 and then rallied

about a point. Hudson dropped 3 points

to 61 and then rallied slightly. General

Motors, selling at the 50 percent stock

dividend, closed at 145 after fluctuating

between 140 and 145. Studebaker

continued to receive strong buying sup-

port throughout the session, with buying

influenced by rumors of an extra divid-

end.

The advance in the sugar shares, which

has coincided with stiffening commodity

prices, was temporarily checked by the

omission of the quarterly dividend on

American Beet Sugar preferred, which

broke from 67 to 65 1/2 as new recovery

for the year. South Porto Rican ad-

vanced over a point but the other showed

only fractional changes.

Pullman Hits New Peak

Pullman, which is expected to an-

nounce a stock split-up or special divi-

dend distribution of some kind in the

near future, sold nearly 7 points to 195

195, the highest price since 1910, and

then reacted to 194 on realizing. Bald-

win and Lima Locomotives, General

Electric and Westinghouse Air Brake

closed a point or so higher.

New York Broker Loans

Show a Slight Increase

Washington, D. C., Sept. 13. — (AP) —

Loans held by brokers and dealers from

New York City members of the federal

reserve system were \$2,745,023,000 on

Sept. 3, compared with \$2,745,023,000 for

the previous week, the federal reserve

board announced today.

E. I. du PONT CO. **PAY ANOTHER** **STOCK DIVIDEND**

BY O. A. MATHER.

Another instance of how the marvelous growth of American industry has rewarded investors was offered yesterday. In this case, it concerns E. I. du Pont de Nemours & Co., the largest manufacturer of explosives, and also a large producer of chemicals, paints, dyes, etc. The company also owns a large interest in the General Motors corporation.

The stockholders yesterday voted to change the common stock capitalization from 1,000,000 shares of \$100 par value to 5,000,000 shares of \$20 par value. Each stockholder will receive two new shares for each old share held, which will require 2,661,654 shares, as there now are 1,330,827 shares outstanding. The new shares will be distributed in the treasury for future corporate purposes.

Series of Stock Split-up.

The present company was formed in October, 1916, to succeed the E. I. du Pont de Nemours Powder company. The latter company had received 100 shares of new company stock. The new series of stock dividends began: 7 1/2 per cent in 1920, 50 per cent in 1922, and 40 per cent in 1925. With the present two-for-one split, the owner of 100 shares of the old company will have 1,300 shares.

The stock was listed on the New York stock exchange in May, 1922, and sold as low as \$106 a share. At that time, an investor could have bought 100 shares for \$10,600. Yesterday the closing price was \$303 a share. Assuming that the new shares will be worth \$102, the value of an original 100 shares of the old company would have grown to \$30,300. On the same basis, 100 shares purchased for \$10,600 in 1922 would have grown to 130 shares worth \$33,390.

Sugar Dividend Discontinued.

The troubles of the sugar industry, which now is believed to be on the mend, were emphasized yesterday when the American Beet Sugar company discontinued its regular quarterly dividend of 1 1/2 cents a share on the preferred stock. Dividends on the common stock were discontinued last spring. The American Beet Sugar company yesterday advanced its price on settled sugar 10 points to 5.80 cents a pound.

Other dividend news was cheerful.

The Midland Steel Products company declared cash dividends of \$1 on the preferred and 49 cents on the common. The company also declared an extra dividend of 50 cents. The Lons Star Gas company declared a quarterly payment of 40 cents, with an initial payment of 57 cents the current year and beyond. The company is entering on one of the most important quarters of its history. The company is entering on one of the most important quarters of its history.

Confidence in the outlook for the steel industry is gaining momentum.

"There is no questioning of prices, as consumers appear glad to place their business at prevailing prices. Construction is continuing at a heavy rate, and carriers are in need of much steel, especially for truck maintenance work. We are entering on one of the most important quarters of its history. The company is entering on one of the most important quarters of its history."

Buying of steel for the fourth quarter is gaining momentum.

"There is no questioning of prices, as consumers appear glad to place their business at prevailing prices. Construction is continuing at a heavy rate, and carriers are in need of much steel, especially for truck maintenance work. We are entering on one of the most important quarters of its history. The company is entering on one of the most important quarters of its history."

We are exporting more steel than in any previous period.

"We are exporting more steel than in any previous period. The company is entering on one of the most important quarters of its history. The company is entering on one of the most important quarters of its history."

WEATHER SIGNS

By FRANK RIDGWAY.

Greenburg, Ind., Sept. 13.—(Special.)—Hoosier farmers are holding their breath and watching the weather day and night, for their corn crop is now hanging in the balance. The Tribune crop survey has taken me through the east central and south central counties, where one of the first crops of corn ever grown stands ready to be nipped by frost or scoured by a fall heat wave that is expected to follow the rainy weather.

Two or three weeks of favorable weather will ripen the crop. Shocks are turning yellow in the early fields and if killing frost and excessive heat come early, the crop will be ruined. There will be a surplus of corn in Ohio, Delaware, Henry, Wayne, Fayette, Franklin, Deatur, and Ripley.

Plants are nearly in the ground. Farmers in Deatur county are going to other sections and buying pigs at 13 1/2 to 14 cents a pound. At Rushville feeders have offered their neighbors as much as 25 cents a pound for pigs. The offer has not been accepted. Some are bringing in feeder cattle at 6 and 7 cents a pound, but most farmers are delaying the buying of other hogs or steers until after they see what is going to happen to the corn crop.

DIVIDENDS DECLARED

You are invited**

You must be *nimble*... you must be *quick* ...when you have but one bathroom

Rush—rush—rush! Rush to get in—rush when you are in. Not enough time for anyone. That's the trouble with not enough bathrooms. Everyone hurries—someone always waits. Important health habits are discouraged—an otherwise well ordered home life is disturbed. Under any circumstances, does it pay to have but one bathroom?

See these Model Bathrooms "More bathrooms within the reach of everyone"

The need for more bathrooms in the home is becoming universally recognized. As proof, note the large number of new homes and apartments in your neighborhood which are being equipped with two, three or more bathrooms each. These builders know that an extra bathroom means more comfort to the occupants and more value to the building.

Come, at your first opportunity, to our wholesale display rooms and see actual proof that small bathrooms can be fine bathrooms—that an extra bathroom occupies only a few square feet of space and costs but little extra.

Here you'll find bathrooms for every purse—ultra modern—fine—amply large—complete in every detail—ten years in advance of ordinary bathroom ideas. More bathrooms within the reach of everyone.

You'll find latest bathroom ideas in beauty and convenience. Modern, exquisite color effects with and without tile. Ingenious arrangements of cabinets and other built-in fixtures.

There are ideas for efficient use of limited space. New methods for giving privacy—for making the main bathroom do double duty.

Hundreds see Model Bathrooms— Everybody praises their beauty

From every visitor to our showrooms comes unserved praise. They say, for example:

"That special father's lavatory for close-up shaving is a gem..." "The mirror and dressing tables are wonderful..." "Wall decorations and lighting are alone worth coming to see..." "The personal apparel closets, making each bathroom a partial dressing room, are indeed clever."

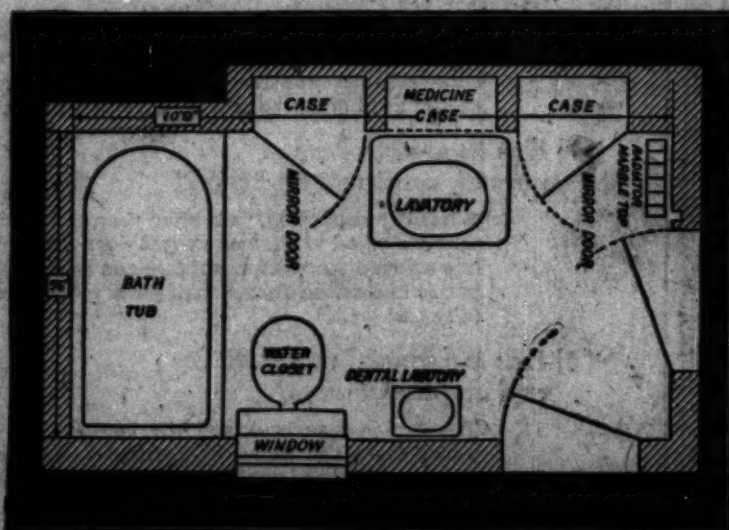

Just west of loop. Near C. & N.W.
and Union Depots

Home owners, prospective home builders, architects, plumbing contractors and real estate men—all will be interested—will be amazed at the modern advancements represented in this remarkable display. No obligations. This display is a contribution by Weil-McLain to the "more bathrooms" idea.

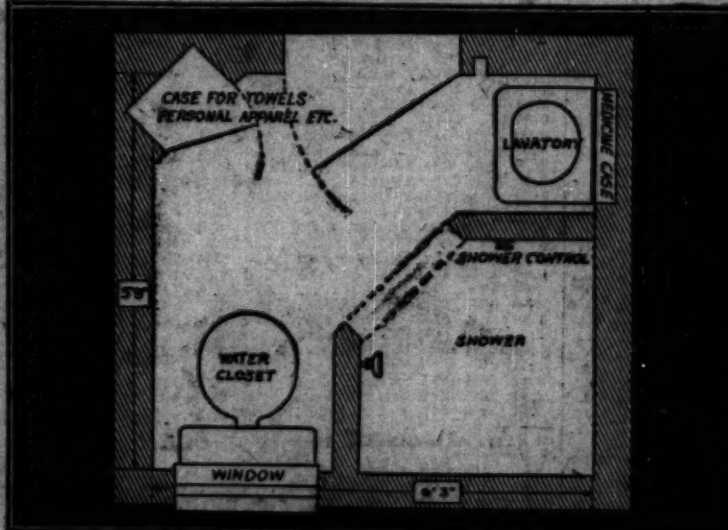

Your visit may mean to you the difference between a commonplace bathroom and one that will be the envy and admiration of your neighbors and friends. A bathroom that will make your house more convenient, comfortable and healthful to live in—more valuable when you offer it for sale.

WEIL-McLAIN COMPANY
Plumbing Division

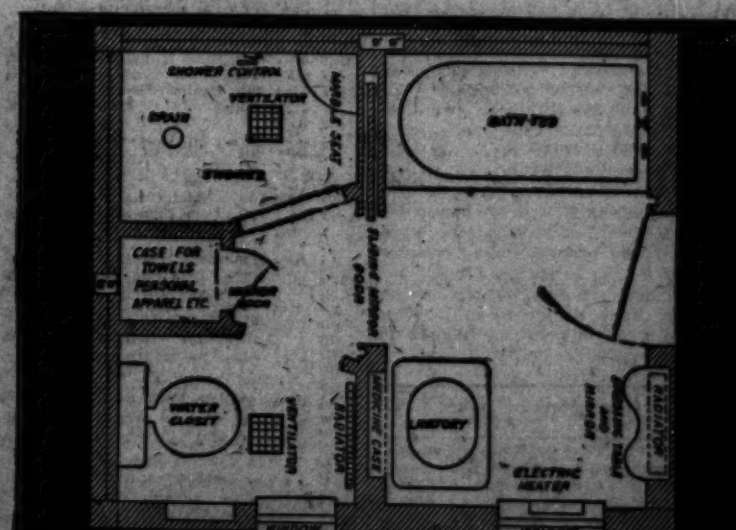

Showrooms and General Offices: 641 West Lake Street, Chicago
(Manufacturers of the well known Weil-McLain Scientific Combination Bather)

CHILDREN'S OR GUEST BATHROOM
The two cases for personal linen, in addition to the medicine case, are appreciated conveniences. The dental lavatory will be a daily reminder to the children to brush their teeth.

SON'S BATHROOM
In such a bathroom as this the son of the family may splash to his heart's content. He can be under the shower as often and as long as he likes without inconveniencing others.

DAUGHTER'S BATHROOM
The above bathroom has been planned with a distinctly feminine note. The distinctness and charm of all the appointments will have an irresistible appeal to the daughter of the family.

PLUMBING EQUIPMENT

For every use in every type of building

Too Much Emphasis Can't Be Given Need of Perfect Vision

Are you grateful enough for the blessing of a pair of good strong eyes? Are you doing everything within reason to preserve their usefulness for many years to come?

"While no normal human being can possibly fail to appreciate in a general way how great a boon vision is, I do not think that any adequate appreciation has yet been made of the vast significance of the visual factor in evolution," says Dr. G. Elliott Smith, professor of anatomy in the University of London.

"The world and most of what is happening in it is made known to us by sight. The attainment of muscular skill is determined mainly by the correlation of eye and hand, the eyes guiding the hand in acquiring what we significantly call dexterity. Our appreciation of beauty is based essentially on the visual appreciation of form, proportion, color and texture, as well as of movement.

"No one can question the tremendous influence of these visual qualities on human relations or doubt the reality of sexual selection in mankind. But in addition to the part such factors play in determining aesthetic feeling and sexual choice, vision is possibly the most significant means of intercommunication between human beings. We judge our fellow men and women by their movements, their gestures, their expressions. We read their feelings and intentions in their facial movements and feel that these speak a truer language than the words of articulate speech. In particular, the eyes themselves are the most eloquent signals of the sentiments and emotions. In addition, the eyes afford indications not merely of the emotions but also of men's thoughts and intentions.

"In man's upward climb it has been the development of vision that has acted as the stimulus to mental growth. Where in the scale of life vision is not developed, the intellect is dwarfed," says Dr. Smith.

Balaban & Katz Theatres

TWO events of unusual interest make this a momentous week for B. & K. patrons. At the CHICAGO you can enjoy the novelty of seeing and hearing George Beban and his entire company of 27 step from the screen to the stage! At the ROOSEVELT, the great picture of the decade, "Variety," is creating the sensation we predicted.

Horse Riders Find These Days of Joy Along North Shore

BY NANCY R.—
These are great days for the riders of the north shore, and almost every afternoon the thrud of horses' hoofs can be heard along the lanes and paths favored by the equestrian world, those byways never frequented by the disburdened, swift traveling motor cars of this age. Enthusiasm for riding, hunting, and racing runs high from now on until the inclemencies of autumn and winter weather call a halt.

One of the gayest of these horse gatherings on the shore for next month is the point-to-point race to be held on the afternoon of Sunday, Oct. 1, the day after the long heralded Ontario hunt race meeting. Austin Niblack, M. F. H., is getting in shape since he and Mrs. Niblack witnessed a similar race in Aiken, S. C., pulled off most successfully by Mrs. Thomas Hitchcock, M. F. H., they have been eager to try it in this part of the world.

Those enterprising and courageous folk who enter the race are to meet at the Benjamin Leslie Behr's stable yard, whence they will be led some miles out into the country by Mr. Niblack and lost. The object is to return as quickly as possible to a certain destination appointed by the M. F. H., which will be secret until he bids them a fond farewell and godspeed. Whoever finishes first wins the prize of the day—you see, it's a test, not so much of fast riding as of finding your way home across hill and dale from some out of the way corner of the countryside.

Farther on down the line the Indian Hill Hunt club, under the guidance of C. Oulton Daughaday, M. F. H., is well launched on its autumn round of activity. The opening run of the season was held last Saturday, and during the rest of the month the hounds meet at the kennels on Tuesday and Thursday at half past six and Saturday at half past three.

Two popular members of the younger set in Lake Forest have returned from their summer wanderings; Miss Laura Thompson is at home again after a several weeks' visit at Miss Eleanor Donnelly's hospitable ranch in Wyoming, and Miss Sarah Brewster arrived here from the Atlantic seaboard on Saturday.

Day's News in Society

At a directors' meeting of the Service club, held yesterday at the residence of Mrs. Henry Platt Withers, committee chairmen were named, in addition to those previously mentioned, to take care of phases of the club's annual drive, to be given Oct. 30 at the Auditorium.

Mrs. Paul Walker is to have charge of properties, Mrs. Robert S. Hots of music and Miss Virginia Avery of refreshments. Mrs. Alexander Revell Jr. and Mrs. Roland Towson are to be in charge of the Halloween dance to follow the performance at the Casino. Mrs. James H. Gregg will assist Mrs. Albert S. Gardner in taking care of publicity.

That portion of society which lingers in Lake Forest after the prescribed time for those who tread the beaten path will have a craft and horse program at tennis events at Onwenta during the remainder of September.

Play for the women's club singles championship will begin tomorrow, as well as the doubles, with the Onwenta golf as the trophy. Men's club singles and doubles also will begin tomorrow, and a mixed doubles handicap tournament will be played later.

Entries close today for all of these events.

Cornelius Crane, son of Mr. and Mrs. R. T. Crane of 1550 Lake Shore drive, is returning this week from a cruise to Bermuda on his new schooner yacht, Meghida. The craft was named for the Crane's niece, Miss Elinor Patterson (Mrs. Russell Sturges Codman Jr.), whose portrayal of the nun Meghida in "The Miracle" met with approval last year.

There will be a meeting of the Lake Geneva Garden club today at the residence of Mrs. Hubbard Carpenter, Mrs. Francis King of Alma, Mich., former president of the Garden Club of America, will speak on "Color in a Michigan Garden." Mrs. King is the guest of Mrs. Tracy C. Drake.

Mr. and Mrs. Benjamin C. Allen and Miss Mildred Allen of 1448 North State parkway have returned from a six weeks' motor trip through the Berkshires and the White mountains.

Mr. and Mrs. Hamilton Voss (Marie Elmo) are moving shortly from 3142 Sheridan road to 3729 Sheridan road. Invitations will be out today for a debut tea for Miss Judith Walsh, daughter of Mr. and Mrs. Richard W. Walsh of 1178 Scott street, Hubbard Woods, which is to be given on the afternoon of Oct. 2 from 4 until 5 o'clock, at the Walsh residence.

Dr. and Mrs. Archibald Church of 4183 Dorchester avenue have returned from Les Cheneux Islands, Mich., where they spent the summer.

Mr. and Mrs. Henry A. Pope of Wilmette have announced the engagement of their daughter, Elizabeth, to Sherman Bowley Barnett, son of Mr. and Mrs. Otto R. Barnett of Glenview.

Announcement is made by Mr. and Mrs. Frank M. Shipley of Piqua, O., of the engagement of their daughter, Betty, to Frederick Reid Cross of Chicago.

Mrs. William P. Johnston and her son, Mr. Wynant P. Johnston, are back from Hot Springs, where they spent several weeks and have opened their home in Georgetown. Mr. Johnston is a grandson of Mrs. Samuel Johnston of Chicago, formerly of Indianapolis.

Yaqui Indians Reported to Have Captured Former President of Mexico—Aldermen Hear Traction Plan

ELGIN COUPLE IN MOTOR CAR KILLED BY TRAIN. Al C. Parker, manager of Elgin Motor club, and his fiancée, Miss Ione Long, run down near Morris, Ill.
(Story on page 5.)

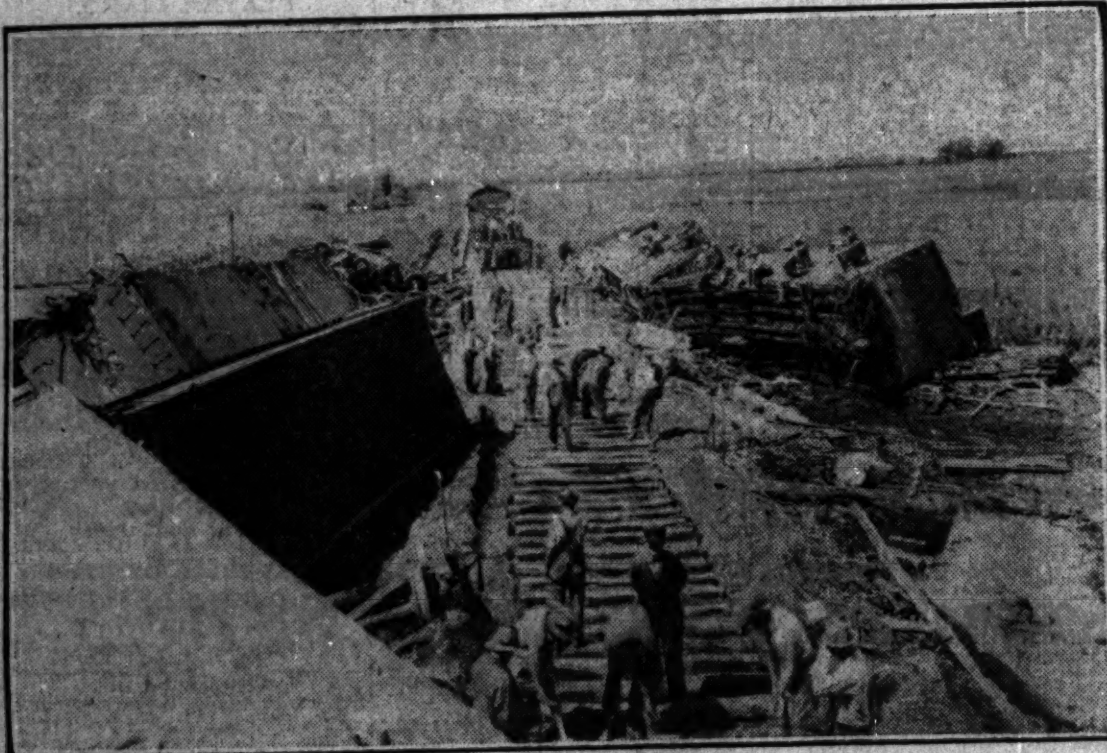

NEW YORK BANKERS' TRACTION PLAN PRESENTED TO ALDERMEN. Left to right: Frederick J. Lisman, New York financier; John Maynard Harlan, who presented plan, and T. V. Salt before council committee on local transportation.
(Story on page 1.)

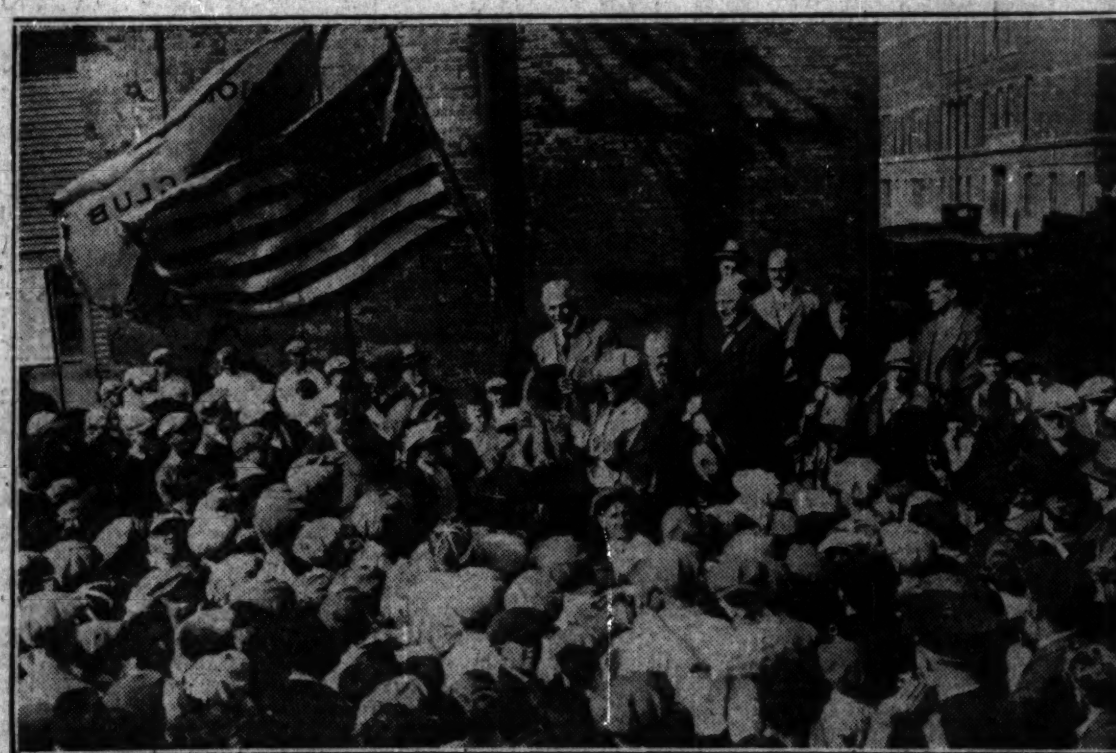

ATTACKED BY YAQUIS. Gen. Alvaro Obregon, former president of Mexico.
(Story on page 1.)

OPERA STAR AND HIS FAMILY BACK IN CHICAGO. Left to right: Mrs. Tito Schipa, Elina Schipa, Tito Schipa, and Nicolo Carforio, Schipa's protegee, at La Salle street station.
(Story on page 31.)

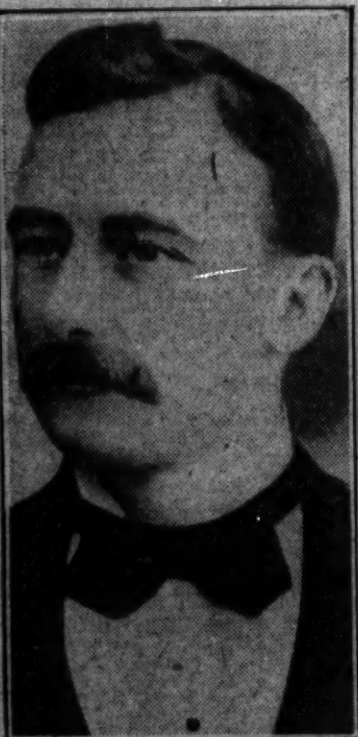

RAILROADS SUFFER HEAVY LOSSES FROM MIDWESTERN FLOODS. Scene on the Nickel Plate railroad near Holder, Ill., where the water undermined the roadbed, derailing thirty-five cars and demolishing a number of them.
(Story on page 4.)

GROUND BROKEN FOR NEW HOME FOR BOYS' CLUB. L. B. Kilbourne of the Union League club, which is erecting the clubhouse, addressing crowd of boys at Emerson avenue and Lincoln street. Ald. J. H. Smith of the 32d ward is standing beside him.
(Story on page 31.)

ARMY OF 4,000 GATHERS FUNDS FOR CHARITY. Helen Bromstad tagging at the corner of Jackson boulevard and Michigan avenue.

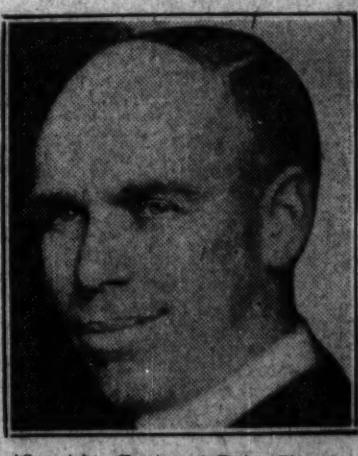

SHOT BY ROBBERS. William G. Girard, wounded, probably fatally, fighting bandits.
(Story on page 34.)

ARCHITECT FOUND DEAD. George W. Maher, who is believed to have killed himself.
(Story on page 9.)

BELMONT BATHING BEACH BEAUTY CONTEST WINNER SELECTED. Margaret Knight, chosen as Miss Belmont by the Belmont Boosters' association, receiving flowers from the crowd around the judges' stand at Lincoln avenue and Melrose street.

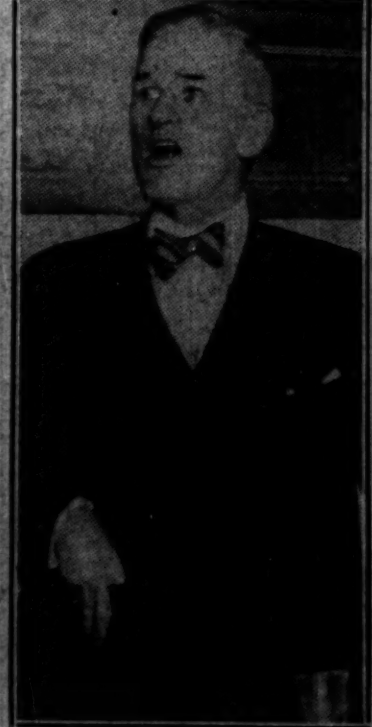

VICTOR IN MAINE. Gov. Ralph O. Brewster re-elected by Republicans.
(Story on page 1.)

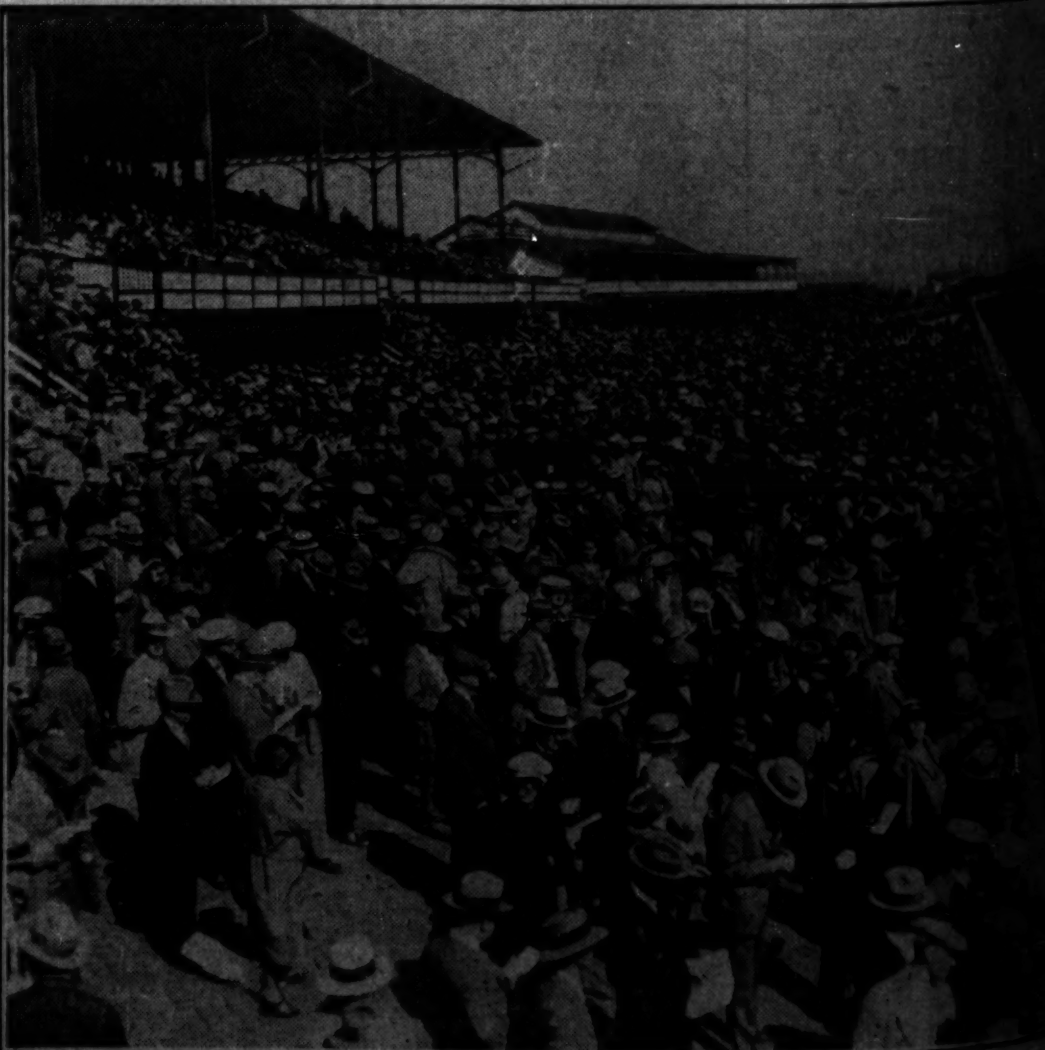

RAISIN BREAD TREAT FOR MEN ON BREAD AND WATER DIET. Roy Carson, 35 year old farmer (left), and Thomas Nelson, 50 year old farmer, enjoying Sunday feast in jail at Tekamah, Neb., where they are imprisoned for violating prohibition laws.
(Story on page 16.)

AVIATOR KILLED. Lieut. Harmon J. Norton, U. S. M. C., crashes to death in plane in Potomac.
(Story on page 16.)

TALKS TO LEGION. Carl Magee, Albuquerque editor, speaks for freedom of press.
(Story on page 18.)

OPENING OF RACING SEASON AT HAWTHORNE ATTRACTS 7,000. and in front of the grandstand at the old track just west of the city limits yesterday afternoon day racing meeting was opened.
(Story on page 22.)
